DREAM. BELIEVE. ACHIEVE

# **MB SCHOOL OF PHARMACEUTICAL SCIENCES**

# Pharm.D

# MBU23 Academic Regulations and Curriculum (Version 1.0)

(Academic Regulations are applicable to Pharm.D and Pharm.D(PB) Programs offered by MB School of Pharmaceutical Sciences in MBU from 2023-24 onwards) **MBUMOHAN BABU UNIVERSITY** 

# Vision

To be a globally respected institution with an innovative and entrepreneurial culture that offers transformative education to advance sustainability and societal good.

# **Mission**

- Develop industry-focused professionals with a global perspective.
- Offer academic programs that provide transformative learning experiencefounded on the spirit of curiosity, innovation, and integrity.
- Create confluence of research, innovation, and ideation to bring about sustainable and socially relevant enterprises.
- Uphold high standards of professional ethics leading to harmonious relationship with environment and society.

# **MB SCHOOL OF PHARMACEUTICAL SCIENCES**

# Vision

To be a global leader in the field of Pharmaceutical Education and Health Care Management by providing Quality Education, Training, Research and Entrepreneurial Ecosystem.

# Mission

- Developing competencies and skills to solve problems in the field of Pharmaceutical Sciences through contemporary Curriculum and congenial learning environment.
- > Imbibing ethics and values in students for effective Pharmaceutical practice through curricular, co-curricular and extra-curricular activities.
- Encourage faculty and staff to excel in their respective fields and demonstrate the best of their abilities by way of continuing education, research and consultancy.

# **PROGRAM EDUCATIONAL OBJECTIVES**

After few years of graduation, the graduates of Pharm. D will:

- **PEO1.** Promulgate the compendious Pharm. D (PB) program with professional knowledge, skills, research and competencies to work in all the domains of pharmaceutical sciences
- **PEO2.** Provide students with Knowledge and abilities to deliver pharmaceutical care in all clinical settings.
- **PEO3.** Develop creative thinking in clinical pharmacy services and encourage adaptation to changing patterns in medical research.
- **PEO4.** Instigate experiential learning practices and hands on training in advanced clinical pharmacy practice services.

# **PROGRAM OUTCOMES**

On successful completion of the Program, the graduates of Pharm.D Program will be able to:

- **PO1.** Apply the **knowledge** of pharmaceutical sciences and practice in providing solution of complex clinical pharmacy practice and pharmaceutical care.
- **PO2.** Apply knowledge and skills to **analyze** day-to-day professional needs of the health care by serving hospital, community and industrial needs.
- **PO3.** Design **solutions** in patient care area and clinical drug development by applying skills developed during pharmacy education.
- **PO4.** Utilize research-based knowledge and research methods for **complex problems** by experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- **PO5.** Utilize appropriate techniques, resources, and modern pharmaceutical and IT **tools** including drug information database, statistical analysis, PK/PD modeling prediction and bioinformatics modeling.
- **PO6.** Create awareness regarding **societal**, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Clinical pharmacy practice.
- **PO7.** Understand the impact of the professional pharmaceutical solutions in societal and **environmental** contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO8.** Apply **ethical** principles and commit to professional ethics and responsibilities and norms of the clinical Pharmacy practice.
- **PO9.** Function **effectively** as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

- **PO10.** Communicate effectively on complex clinical problems with the pharmacy communicate and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11.** Demonstrate knowledge and understanding of the **project and financial management** principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- **PO12.** Recognize the need for, and have the preparation and ability to engage in independent and **life-long learning** in the broadest context of modern medical sciences.

# **PROGRAM SPECIFIC OUTCOMES**

On successful completion of the Program, the graduates of Pharm.D Program will be able to:

- **PSO 1.** Acquire knowledge in the field of synthetic and natural sources of drugs with their chemistries as well as formulation and evaluation including their regulatory requirements.
- **PSO 2.** Understand the fundamentals in physiology, anatomy, biochemistry, microbiology and pathophysiology understand pharmacotherapy and able to explain the pharmacological and toxicological aspects of various drugs.
- **PSO 3.** Apply their expertise in pharmacovigilance, clinical research, pharmacoepidemiology and economics.
- **PSO 4.** Comprehend the role of pharmaceutical care concepts of hospital, community and clinical pharmacy for serving the society.

#### 1. Preamble

Modern era students would like to take decisions on their own and plan their future accordingly. Students would like to pursue education as per their pace. On other hand, employers expect multidisciplinary competency, leadership skills and computer literacy along with lifelong learning skills from the students. The conventional learning system has narrow scope with regard to flexibility in choosing courses of their choice to become a well-rounded personality. It is essential that the present education system should address this and provide wide opportunities for students to choose programs and courses of their interest in order to realize their full potential which in turn leads to the nation development. Further, natural resources are depleted globally at a faster rate. Hence, sustainable development has become the agenda for the complete world to preserve natural resources and environment for the sake of future generations. In addition, the world is embracing disruptive technologies to improve the quality of life. Also, students should be nurtured with skills on higher order cognitive capacities, research, innovation, incubation and entrepreneurship; life skills; social consciousness, inclusiveness, equality, culture, languages, literature, ethics and values; basic arts, crafts, humanities, games, sports and fitness.

In this context, Mohan Babu University has taken initiative and brought out Academic Regulations addressing Choice Based Credit System, sustainable development, disruptive technologies, rapid change in knowledge landscape, change in employment landscape, change in global ecosystem and other areas of national and international importance to change country's educational landscape and in turn country's landscape.

MBU23 Academic Regulations embrace Choice Based Credit System, project-based learning, enhanced practical component, etc.

#### 2. Scope

The rules and regulations stated herein shall be called "MBU23 Academic Regulations" in its complete form. MBU23 academic regulations as given in this document are applicable to students admitted in PG Programs offered under MBU from the academic year 2023-24 onwards. All academic programs under MBU23 shall be decided by the Academic council. MBU23 is applicable for both existing as well as new programs offered by the MBU, until and unless it is explicitly stated.

#### 3. Regulations for Pharm.D and Pharm.D (P.B) Programs offered under MBU

These regulations shall be called "The Regulations for the Pharm.D and Pharm.D(P.B) Degree Programs". They shall come into effect in the academic year 2023–24. The regulations framed are subject to modifications from time to time by Mohan Babu University (MBU) in line with the Pharmacy Council of India (PCI).

#### 4. Definitions and Nomenclature

'**Degree**' means the academic award conferred upon a student on successful completion of any program of study designed to achieve the defined attributes.

'**Program**' means cohesive arrangement of courses, co-curricular and extracurricular activities to accomplish predetermined objectives leading to the awarding of a degree in a branch or discipline. Some Degree programs also provide options to specialize in a specific domain of interest in a branch or discipline.

'**Course**' means any combination of lecture, tutorial, practical and project-based learning sessions of a subject studied in a year, like Pharmaceutics, Pharmaceutical Analysis, Pharmacology and Pharmacognosy, Pharmacotherapeutics etc.

# 5. Admission

**5.1 Number of Seats:** The number of seats in Pharm.D and Pharm.D(P.B) programs for which admission is to be made will be decided by the Board of Management, MBU with approval from Pharmacy Council of India.

#### 5.2 Nationality and Age:

Resident Indian or Non-Resident Indian (NRI), holder of PIO or OCI card issued by Government of India is eligible to apply for Selection Process.

**Note:** NRIs, holders of PIO or OCI card issued by Government of India must apply under international student category only.

Student should have attained the age of 17+ years on the 31st December of the year in which he/she is seeking admission in Pharm.D.

Student should have attained the age of 21+ years on the 31st December of the year in which he/she is seeking admission in Pharm.D(PB).

#### 5.3.a. Eligibility Criteria for Pharm.D Program

A Pass in the following examinations

- a) 10 + 2 examination with Physics and Chemistry as compulsory subjects along with either mathematics or Biology.
- b) A pass in D.Pharm course from an institution approved by Pharmacy Council of India under section 12 of Pharmacy Act
- c) Any other qualification approved by Pharmacy Council of India as equivalent to any of the above examinations

#### 5.3.b. Eligibility Criteria for Pharm.D (P.B) Program

A Pass in the following examinations

a) B. Pharm Degree examination of an Indian university established by law in India from an institution approved by Pharmacy Council of India and has scored not less than 55 % of the maximum marks (aggregate of 4 years of B. Pharm)

b) Every student, selected for admission to post graduate pharmacy program in any PCI approved institution should have obtained registration with the State Pharmacy Council or should obtain the same within one month from the date of his/her admission, failing which the admission of the candidate shall be cancelled.

Note: It is mandatory to submit a migration certificate obtained from the respective university where the candidate had passed his/her qualifying degree (Bachelor of Pharmacy)

Candidates with valid scores in National level entrance exams like GPAT, PGCET is eligible for direct admission in Pharm.D (P.B)

5.4 Authority for Admission: Any matter related to admission to any program, the decision of

the Admission Committee is final.

If, at any time after admission, it is found that a candidate has not fulfilled the requirements stipulated in the offer of admission, the concerned School Dean may revoke the admission of the candidate and report the matter to the Vice Chancellor.

In Addition to the above, admissions will be based on the rules and regulations of the UGC/Competent authorities in force at the time of admissions.

#### 6. Academic System

#### 6.1 Annual system

Pharm.D program offered by MB School of Pharmaceutical Sciences shall follow the year system. The Program is for 6 years (course work for five academic years and one-year internship).

Pharm.D(P.B) program offered by MB School of Pharmaceutical Sciences shall follow the year system. The Program is for 3 years (course work for two academic years and one-year internship).

#### 6.2 Curriculum

The university Academic Regulations shall have 5-digit alpha-numeric representation that refers to University Name followed by last two digits of Calendar Year viz. MBU23 Regulations. Program Curriculum shall have the corresponding Academic Year representation. Students admitted into a program shall adopt a curriculum specified by the Academic Council for that academic year. Unless otherwise stated explicitly by the Academic Council, any curriculum changes will be applicable to the students admitted in the subsequent year and the existing batches continue to follow the curriculum prescribed at the time of their joining the program.

#### 6.3 Course Classification

Courses may be classified as Theory, Practical, Project work, Clerkship and Internship.

#### 6.4 Syllabus

The syllabus of a course provides what the student will learn in the course of study. Each course syllabus document contains course code, course title, L T P, course description, course outcomes, module-wise topics, duration to cover each module, text books, reference books, video lectures and web resources for additional learning.

#### 6.5 Course Handout

A Course Handout consists of a detailed plan of lectures and its mode of delivery, List of Exercises/Experiential learning, Resources, Evaluation methods, Model Question paper and CO Attainment Targets.

#### 7. Academic Calendar

The academic calendar includes the dates with regard to course registrations, spell of instructions, continuous internal assessment tests, year-end theory examinations, practical examinations and year holidays. The Registrar will communicate the Academic calendar to the Departments/ Schools, and the same will be available on the website. The dates and schedules in the academic calendar may change in specific programs due to regulatory and local requirements. In such cases, the concerned School Dean with prior authorization will communicate the changes to the

students. The revised academic calendar will also made available on the website.

#### 8. Course Registration

Immediately after joining the University, each student shall be assigned a Mentor by the Department/School concerned. The mentor shall discuss with the student on their academic performance year-wise, periodically, and guide the student on nature and number of courses to be registered in the ensuing year, within the framework of that program curriculum.

- Through the course registration process, every year, it is mandatory for the students to register for the courses specified in the year as and when notified, with the approval of the mentor.
- Students shall not be permitted to register for the courses if the student has any outstanding dues to the University.

#### 8.1 Arrear Examination:

- If a student failed in a course, then the student is allowed to register for arrear examinations as and when notified.
- If a student has backlog courses after completion of the program of study, a provision is given to clear the courses by appearing any number of arrear examinations upon the notifications within the stipulated program duration.

#### 9. Attendance Requirements

- A student shall be eligible to appear for year-end examinations if he acquires a minimum of 80% of attendance in aggregate of all the courses in a year.
- Condonation of shortage of attendance in aggregate up to 10% (70% and above and below 80%) in each year may be granted by the School Dean.
- ✤ Shortage of attendance below 70% in aggregate shall in no case be condoned.
- Students whose shortage of attendance is not condoned in any year shall not be eligible to take their year-end examination and their registration shall stand cancelled.
- Student shall not be promoted to the next year unless he satisfies the attendance requirements of the year, as applicable. The student may seek readmission for the year when offered next. He will not be allowed to register for the courses of the year while he is in detention.
- Stipulated fee shall be payable to the university towards condonation of shortage of attendance.
- In the remaining 20% of attendance, the student shall manage medical/personnel/ casual/official absence for organizing events/ seminars/ workshops/ technical/ cultural festivals/ competitions/ participation in co- curricular/ extra-curricular events/NCC/NSS activities or any other reason. However, attendance shall be given at actuals for participating in NCC/NSS activities at National level.

#### 10. Academic requirement for promotion/completion of program of study

#### For Pharm.D

- A student shall not be promoted from first year to second year of program of study if he/she failed more than two courses/subjects in first year program of study.
- A student shall not be promoted from second year to third year of program of study if he not PASS all the courses/ subjects pertaining to first year program of study and failed more than two courses/subjects of second year program of study.
- A student shall not be promoted from third year to fourth year of program of study if he not PASS all the courses/ subjects pertaining to second year program of study and failed more than two courses/subjects of third year program of study.
- A student shall not be promoted from fourth year to five year of program of study if he not PASS all the courses/ subjects pertaining to third year program of study and failed more than two courses/subjects of fourth year program of study.
- A student shall not be promoted from fifth year to sixth year of program of study if he not PASS all the courses/ subjects pertaining to fourth year program of study and failed more than two courses/subjects of fifth year program of study.
- The student shall register for all the courses as per the course structure. Marks obtained in all the courses shall be considered for the calculation of award of CLASS.

A student who fails in completion of all courses as per the course structure with in maximum duration of program of study then the admission shall forfeit his seat in the program of study and his/her admission stands cancelled.

#### For Pharm.D(PB)

- A student shall not be promoted from first year to second year of program of study if he/she failed more than two courses/subjects in first year program of study.
- A student shall not be promoted from second year to third year of program of study if he not PASS all the courses/ subjects pertaining to first year program of study and failed more than two courses/subjects of second year program of study.
- The student shall register for all the courses as per the course structure. Marks obtained in all the courses shall be considered for the calculation of award of CLASS.
- A student who fails in completion of all courses as per the course structure with in maximum duration of program of study then the admission shall forfeit his seat in the program of study and his/her admission stands cancelled.

#### 11. Evaluation Criteria

#### 11.1 Scheme of Evaluation

All components in any Program of Study shall be evaluated through Internal Evaluation and/or

Yea	ir End Eva	aluati	ion.

#### 11.2 Project work

A Student has to take up and complete project work. He or she must identify the topic of project work, collect relevant literature, preliminary data, implementation tools/ methodologies, practical investigations, implementation, analysis of results, validation and report writing.

The student shall be allowed to develop data collection and reporting skills in the area of community, hospital and clinical pharmacy, a project work shall be carried out under the supervision of a faculty. The project topic must be approved by the Head of the Department or Head of the Institution. Project work shall be presented in a written report and as a seminar at the end of the year. External and the internal examiners shall do the assessment of the project work.

#### **Internal Examination**

A student has to present the progress of the Research Work to the Project Evaluation Committee (PEC). The performance of the student shall be evaluated on the basis of TWO reviews along with detailed discussions. Each review shall be conducted for a maximum of "30" marks. The average of two review marks shall be finalised for a maximum of 30 marks.

The Project Evaluation Committee (PEC) consisting of concerned supervisor and two senior faculty members shall monitor the progress of the project work of the student. The PEC is constituted by the respective School Dean on the recommendations of the Head of the Department

#### Year End Examination

The Year-end examination shall be conducted by a Committee consisting of an External Examiner, HOD and concerned Supervisor. If required, multiple committees shall be constituted for multiple sections with prior approval. The External Examiner shall be nominated by the respective School Dean from the panel of Examiners submitted by the Department.

- The Thesis report shall be made plagiarism check and the report only with less than 20% shall be accepted.
- It is mandatory that every student has to publish/submit acceptance letter of a paper in a peer reviewed Journal or Conference before year End Examinations. Otherwise, the student is not eligible for submission of thesis report.
- If the report of the examiner is not favourable, the dissertation should be revised and resubmitted after a minimum period of three months.
- The students who fail in Project work Viva-Voce examination shall have to re-appear for the Viva-Voce examination after three months.
- Extension of time for completing the project is to be obtained from the Chairman, Academic Council, MBU.

#### 11.3. Clerkship

The student shall collect the Patient case records from various departments viz, General Medicine, General Surgery, Pediatrics, Psychiatry etc., of the designated hospital during second year of program of study.

#### Internal Examination

A student has to present the report on the above to the Clerkship Evaluation Committee (CEC). The performance of the student shall be evaluated on the basis of TWO reviews along with detailed discussions. Each review shall be conducted for a maximum of "30" marks. The average of two review marks shall be finalised for a maximum of 30 marks.

#### Year End Examination

The Year-end examination shall be conducted by a Committee consisting of an External Examiner, HOD and concerned Supervisor. If required, multiple committees shall be constituted for multiple sections with prior approval. The External Examiner shall be nominated by the respective School Dean from the panel of Examiners submitted by the Department.

#### 11.4 Internship

- 1. Internship is a phase of training wherein a student is expected to conduct actual practice of pharmacy and health care and acquires skills under the supervision so that he or she may become capable of functioning independently.
- 2. Every student has to undergo 12 months internship (Full third year of program of study).
- 3. Other details:
- All parts of the internship shall be done, as far as possible, in institutions in India. In case of any difficulties, the matter may be referred to the Pharmacy Council of India to be considered on merits.
- ii) Where an intern is posted to district hospital for training, there shall be a committee consisting of representatives of the university, and the district hospital administration, who shall regulate the training of such trainee. For such trainee a certificate of satisfactory completion of training shall be obtained from the relevant administrative authorities which shall be countersigned by the Dean of the School.
- iii) Every candidate shall be required to undergo internship during the last year of study for the satisfaction of the University concerned for a period of twelve months so as to be eligible for the award of the degree of Pharm.D. or Pharm.D. (Post Baccalaureate) as the case may be.

#### 4. Assessment of internship:

- i) The intern shall maintain a record of work which is to be verified and certified by the preceptor (teacher practioner) under whom he works. Apart from scrutiny of the record of work, assessment and evaluation of training shall be undertaken by an objective approach using situation tests in knowledge, skills and attitude during and at the end of the training. Based on the record of work and date of evaluation, the Dean shall issue certificate of satisfactory completion of training, which is mandatory for award of degree.
- ii) Satisfactory completion of internship shall be determined on the basis of the following
- (1) Proficiency of knowledge required for each case management SCORE 0-5
- (2) The competency in skills expected for providing Clinical Pharmacy Services SCORE 0-5
- (3) Responsibility, punctuality, work up of case, involvement in patient care SCORE 0-5
- (4) Ability to work in a team (Behavior with other healthcare professionals including medical doctors, nursing staff and colleagues). SCORE 0-5
- (5) Initiative, participation in discussions, research aptitude.

#### SCORE 0-5

0-Poor; 1- Fair; 2-Below Average; 3-Average; 4-Above Average; 5-Excellent;

A Score of less than 3 in any of above items will declared as Fail in internship.

If a student is failed in internship, he has to undergo three months internship as extension and appear for reevaluation.

The result of internship Pass/Fail shall be notified in the Mark sheet.

#### 12. Pass Marks:

A student shall be declared as "PASS" in a course if he/she secures a minimum of 50% of the total marks obtained from Internal assessment and year End Evaluation. Otherwise, he/she shall be declared as "FAIL" in that course. This is not applicable for internship.

#### 12.1. Recounting /Revaluation/Personal Verification/ Challenging Evaluation:

Students shall be permitted to apply for Recounting /Revaluation/Personal Verification/ Challenging Evaluation of the Year End Examination answer scripts within a stipulated period after payment of the prescribed fee. After completion of the process of Recounting/ Revaluation/Personal Verification/ Challenging Evaluation, the records are updated with changes if any, and the student shall be issued a revised mark sheet. If there are no changes, the student shall be intimated the same through a notice.

#### 12.2 Improvement of Internal Assessment

A student shall have the opportunity to improve his/ her performance only once in the mid exam component of internal assessment. The reconduct of mid exam shall be completed before the commencement of end examination of that year.

# **13. Withholding of Results**

Results may be withheld in a year, if

- The student has any dues to the Department/ School/ University
- Action arising out of malpractice is pending
- Action arising out of indiscipline is pending
- The student whose result was withheld shall not be allowed/promoted to the next higher year.

After successful completion of the program and minimum pass mark requirements as specified in the program curriculum, a Provisional Certificate will be issued to eligible students. The degree will be conferred on the student during the subsequent Convocation. The degree certificate will indicate the name of the Program of study, in which the student has graduated. Example: 'Doctor of Pharmacy (Post Baccalaureate)

# 14. Award of Class

Percentage of marks Secured	Class Awarded
≥ 75	First Class with Distinction
≥60 and <74.99	First Class
≥50 and <59.99	Second Class

The marks requirement for the award of class is as follow

#### 15. Migration / Transfer of Candidates

- If a student discontinued in any of the year and later, he wishes to continue in the same program, then the he shall follow the latest regulations and curriculum that is being implemented during readmission into the same year. However, the earned marks before discontinued shall be transferred and he has to complete his degree within the stipulated program duration.
- A similar procedure shall be adopted for the candidates who are seeking admission from other universities into various eligible programs of the University, subject to the condition that those Universities are recognized and approved for transfer by MBU.
- If the other Universities follow a different system, then the program School into which the student is seeking admission/ transfer shall work out on equivalence that are to be transferred with valid supporting documentation.
- The number of completed courses thus transferred will be considered for the minimum requirements of the program, but not considered for award of class calculations. The courses along with secured marks thus transferred will be indicated at the bottom of the Consolidated mark sheet as 'Total Courses Transferred from (Name of the Institute, place and Country)' and no breakup of courses will be listed.

Award of degree classification is purely based on the marks secured considering during the program of study with the MBU.

#### 16. Program Duration

*Minimum Duration:* The minimum duration for Pharm.D and Pharm.D(PB) Programs is detailed below

A student is said to be completed the program only if he/she successfully pass all courses as specified in their program curriculum. However, the degree shall be awarded only upon the completion of minimum duration of the program concerned.

**Maximum Duration:** if a student has backlog courses even after the completion of the minimum duration limit, an additional grace period equivalent to double the period of minimum duration of the program of study shall be extended. Under no circumstances, the period of study shall be extended beyond the above limit and thereafter his/her studentship stands cancelled automatically. No separate intimation in this regard will be sent to the student.

#### **17.** Award of Degree

**Eligibility:** A student shall be eligible for the award of Pharm.D Degree or Pharm.D(PB) if he fulfills all the following conditions:

- Registered and successfully completed all the components prescribed in the Program of study to which he is admitted.
- Has NO DUES to the University, Hostel, Library etc. and to any other amenities provided by the University.
- No disciplinary action is pending against him.

After successful completion of the program and minimum pass requirements as specified in the program curriculum, a Provisional Certificate will be issued to eligible students. The degree will be conferred on the student during the subsequent Convocation.

#### 18. Amendments to Regulations

The Academic Council headed by the Vice-Chancellor of the University has the right to revise, amend, or change any component of regulations from time to time. In case of any dispute arising in interpreting the rules, the Academic Council's interpretation shall be the final decision.

#### 19. General

The words such as "he", "him", "his" and "her" shall be understood to include all students irrespective of gender connotation.

**Note:** Failure to read and understand the regulations is not an excuse.

#### **GUIDELINES FOR DISCIPLINARY ACTION FOR MALPRACTICES /**

# IMPROPER CONDUCT IN EXAMINATIONS

Rule No.	Nature of Malpractices/Improper conduct	Punishment
NO.	If the candidate:	
1. (a)	Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the course of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the course of the examination)	cancellation of the performance in that
(b)	Gives assistance or guidance or receives it from any other candidate orally or by any other body language methods or communicates through cell phones with any candidate or persons in or outside the exam hall in respect of any matter.	Expulsion from the examination hall and cancellation of the performance in that course only of all the candidates involved. In case of an outsider, he will be handed over to the police and a case is registered against him.
2.	Has copied in the examination hall from any paper, book, programmable calculators, palm computers or any other form of material relevant to the course of the examination (theory or practical) in which the candidate is appearing.	Expulsion from the examination hall and cancellation of the performance in that course and all other courses the candidate has already appeared including practical examinations and project work and shall not be permitted to appear for the remaining examinations of the courses of that Year. The Hall Ticket of the candidate is to be cancelled.
3.	Impersonates any other candidate in connection with the examination.	The candidate who has impersonated shall be expelled from examination hall. The candidate is also debarred for four consecutive years from class work and all Year-end examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. The performance of the original candidate who has been imperconated shall be
		who has been impersonated, shall be cancelled in all the courses of the examination (including labs and project work) already appeared and shall not be allowed to appear for examinations of the remaining courses of that year. The candidate is also debarred for four consecutive years from class work and all Year-end examinations, if his involvement is established. Otherwise, The candidate is

Rule	Nature of Malpractices/Improper conduct	Punishment
No.	If the candidate:	
		debarred for two consecutive years from class work and all Year-end examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. If the imposter is an outsider, he will be handed over to the police and a case is registered against him.
4.	Smuggles in the Answer book or additional sheet or takes out or arranges to send out the question paper during the examination or answer book or additional sheet, during or after the examination.	Expulsion from the examination hall and cancellation of performance in that course and all the other courses the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the courses of that year. The candidate is also debarred for two consecutive years from class work and all Year-end examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
5.	Uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award pass marks.	Cancellation of the performance in that course only.
6.	Refuses to obey the orders of the Chief Controller of Examinations/Controller of Examinations/any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the Controller of Examinations or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the Controller of Examinations, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which result in damage to or destruction of property in the examination hall or any part of the College campus or engages in any other act which in the opinion of the officer on duty amounts to use of unfair means or misconduct or has the	be expelled from examination halls and cancellation of their performance in that course and all other courses the candidate(s) has (have) already appeared and shall not be permitted to appear for the remaining examinations of the courses of that year. If the candidate physically assaults the invigilator/Controller of the Examinations, then the candidate is also debarred and forfeits his/her seat. In case of outsiders, they will be handed over to the police and a police case is registered against them.

Rule No.	Nature of Malpractices/Improper conduct	Punishment
NO.	<i>If the candidate:</i>	
	tendency to disrupt the orderly conduct of the examination.	
7.	Leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.	Expulsion from the examination hall and cancellation of performance in that course and all the other courses the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the courses of that year. The candidate is also debarred for two consecutive years from class work and all Year-end examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
8.	Possess any lethal weapon or firearm in the examination hall.	Expulsion from the examination hall and cancellation of the performance in that course and all other courses the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the courses of that year. The candidate is also debarred and forfeits the seat.

**Note:** Whenever the performance of a student is cancelled in any course(s) due to Malpractice, then it shall be treated as failed in that course.

#### Pre-Requisite Anti-Requisite Co-Requisite

**COURSE DESCRIPTION:** This course provides a comprehensive overview of human anatomy a d physiology, covering cellular structures, tissues, skeletal, cardiovascular, lymphatic, respirator, digestive, nervous, urinary, endocrine, reproductive systems, and sense organs. It also address is common disorders and the physiological effects of exercise and drugs on the human body.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Understand anatomy and physiology basics, including terminologies, cellular structures, components, functions, and types of human tissues.
- **CO2.** Describe the skeletal system, joint classifications, movements, and common disorders. Analyze blood composition, haemopoesis, clotting mechanisms, and blood disorders.
- **CO3.** Explain lymphatic system functions, spleen structure, and lymphatic disorders. Comprehe d cardiovascular system anatomy, heart functions, circulation, ECG, and related disorders.
- **CO4.** Understand respiratory system anatomy, mechanisms, gas transport, and disorders. Describe digestive system anatomy, accessory glands, digestion, and absorption processes
- **CO5.** Explain nervous system anatomy and functions, including cerebrum, cerebellum, midbrain, thalamus, hypothalamus, spinal cord, cranial nerves, and the autonomic nervous system.
- **CO6.** Describe the endocrine system, reproductive system, sense organs, skeletal muscles, exercise effects on physiology, and the impact of drugs on athletic performance.

#### CO-PO-PSO Mapping Table:

#### COURSE CONTENT

#### MODULE 1: INTRODUCTION, CELLS, AND TISSUES

- Scope of Anatomy and Physiology: Basic terminologies used in this subject (Description of the body as such planes and terminologies)
- **Structure of Cell:** Its components and their functions
- **Elementary Tissues of the Human Body:** Epithelial, connective, muscular, and nervous tissues their sub-types and characteristics.

#### MODULE 2: OSSEOUS AND HAEMOPOETIC SYSTEMS

#### • Osseous System:

- Structure, composition, and functions of the skeleton.
- $\circ~$  Classification of joints, types of movements of joints, and disorders of joints (Definitions only)

#### Haemopoetic System:

- Composition and functions of blood
- Haemopoesis and disorders of blood components (definition of disorder)
- o Blood groups
- Clotting factors and mechanism
- Platelets and disorders of coagulation

#### MODULE 3: LYMPHATIC AND CARDIOVASCULAR SYSTEMS

- Lymph:
  - Lymph and lymphatic system: composition, formation, and circulation
  - Spleen: structure and functions, disorders
  - Disorders of the lymphatic system (definition only)

#### • Cardiovascular System:

- Anatomy and functions of the heart
- Blood vessels and circulation (Pulmonary, coronary, and systemic circulation)
- Electrocardiogram (ECG)
- Cardiac cycle and heart sounds
- Blood pressure its maintenance and regulation
- Definition of the following disorders: Hypertension, Hypotension, Arteriosclerosis, Atherosclerosis, Angina, Myocardial infarction, Congestive heart failure, Cardiac arrhythmias.

#### MODULE 4: RESPIRATORY AND DIGESTIVE SYSTEMS

#### • Respiratory System:

- Anatomy of respiratory organs and functions
- Mechanism/physiology of respiration and regulation of respiration
- Transport of respiratory gases
- Respiratory volumes and capacities
- Definition of Hypoxia, Asphyxia, Dybarism, Oxygen therapy, and resuscitation.

#### • Digestive System:

- Anatomy and physiology of the gastrointestinal tract (GIT)
- Anatomy and functions of accessory glands of GIT
- Digestion and absorption
- Disorders of GIT (definitions only)

#### MODULE 5: NERVOUS AND URINARY SYSTEMS

 Nervous System: Definition and classification of the nervous system - Anatomy, physiology, and functional areas of the cerebrum - Anatomy and physiology of the cerebellum - Anatomy and physiology of the midbrain - Thalamus, hypothalamus, and Basal Ganglia - Spinal cord: Structure & reflexes - mono-poly-planter - Cranial nerves names and functions - ANS - Anatomy & functions of the sympathetic & parasympathetic

(12 Periods)

# (13 Periods)

(10 Periods)

nervous system.

• **Urinary System:** Anatomy and physiology of the urinary system - Formation of urine - Renin-Angiotensin system - Juxtaglomerular apparatus - acid-base balance - Clearance tests and micturition.

#### MODULE 6: ENDOCRINE, REPRODUCTIVE, SENSE ORGANS, MUSCLES, (15 Periods) AND SPORTS PHYSIOLOGY

- **Endocrine System** Pituitary gland Adrenal gland Thyroid and Parathyroid glands Pancreas and gonads.
- **Reproductive System** Male and female reproductive system Their hormones Physiology of menstruation Spermatogenesis & Oogenesis Sex determination (genetic basis) Pregnancy and maintenance, and parturition Contraceptive devices.
- Sense Organs Eye Ear Skin Tongue & Nose.
- **Skeletal Muscles** Histology Physiology of muscle contraction Physiological properties of skeletal muscle and their disorders (definitions).
- **Sports Physiology** Muscles in exercise, Effect of athletic training on muscles and muscle performance Respiration in exercise, CVS in exercise, Body heat in exercise, Body fluids and salts in exercise Drugs and athletics.

#### Total Periods: 75

#### RESOURCES

#### BOOKS:

1. Essentials of Medical Physiology by K. Sembulingam and P. Sembulingam. Jaypee brothers medical publishers, New Delhi.

#### Anti-Requisite Co-Requisite

**COURSE DESCRIPTION:** This course covers pharmacy fundamentals, including dosage forms, prescription handling, and posology. Students will explore pharmacy history, pharmacopoeias, pharmaceutical calculations, and the formulation of powders, liquids, suppositories, and galenicals. It also includes surgical aids and managing pharmaceutical incompatibilities for safe medication use.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1**Understand the classification and definitions of dosage forms, handle prescriptions accurately, and calculate appropriate doses for children and infants.
- **CO2.** Trace the historical development of the pharmacy profession and pharmaceutical industry, and comprehend the evolution and significance of various pharmacopoeias, including the Indian Pharmacopoeia.
- **CO3.** Perform pharmaceutical calculations, including percentage solutions, allegations, proof spirt, and isotonic solutions, and apply these skills in practical scenarios.
- **CO4.** Explain the preparation and evaluation of various solid and liquid dosage forms, such is powders, granules, monophasic, and biphasic liquids, and understand their advantages and disadvantages.
- **CO5.** Describe the preparation and evaluation of semi-solid dosage forms, including suppositories, pessaries, and galenicals, and understand the principles of different extraction processes.
- **CO6.** Identify and address pharmaceutical incompatibilities, and understand the use and preparation of surgical aids, including dressings, sutures, ligatures, and medicated bandages.

# **CO-PO-PSO Mapping Table:**

#### COURSE CONTENT MODULE 1: INTRODUCTION AND FUNDAMENTALS

(10 Periods)

# Introduction to Dosage Forms:

- Classification and definitions
- Prescription: definition, parts, and handling
- Posology: Definition, factors affecting dose selection, calculation of children and infant doses
- Historical Background and Development:
  - Development of the profession of pharmacy and the pharmaceutical industry

# MODULE 2: PHARMACOPOEIAS AND CALCULATIONS

# • Pharmacopoeias:

- o Development of Indian Pharmacopoeia
- Introduction to BP, USP, European Pharmacopoeia, Extra Pharmacopoeia, and Indian National Formulary

# • Weights and Measures:

 $\circ\,$  Calculations involving percentage solutions, allegation, proof spirit, isotonic solutions.

# MODULE 3: SOLID DOSAGE FORMS

# • Powders and Granules:

- Classification, advantages, and disadvantages
- Preparation of simple, compound powders, insufflations, dusting powders, eutectic and explosive powders, tooth powder, effervescent powders, and granules.

# MODULE 4: LIQUID DOSAGE FORMS

# Monophasic Dosage Forms:

- Theoretical aspects of formulation including adjuvants like stabilizers, colorants, flavors with examples
- Study of monophasic liquids like gargles, mouth washes, throat paint, ear drops, nasal drops, liniments, lotions, enemas, and collodions

# • Biphasic Dosage Forms:

 $\circ~$  Suspensions and emulsions: definition, advantages, disadvantages, classification, tests for the type of emulsion, formulation, stability, and evaluation.

#### MODULE 5: SEMI-SOLID DOSAGE FORMS AND EXTRACTION (10 Periods) PROCESSES

# • Suppositories and Pessaries:

- $\circ~$  Definition, advantages, disadvantages, types of bases, method of preparation, displacement value, and evaluation
- Galenicals:
  - $\circ~$  Definition, equipment for different extraction processes like infusion, decoction, maceration, and percolation
  - $\circ$   $\;$  Methods of preparation of spirits, tinctures, and extracts

#### MODULE 6: CALCULATIONS, SURGICAL AIDS, AND INCOMPATIBILITIES

# Pharmaceutical Calculations

- **Surgical Aids:**Surgical dressings, absorbable gelatin sponge, sutures, ligatures, and medicated bandages
- **Incompatibilities:** Introduction, classification, and methods to overcome incompatibilities

Course Code	Course Title	L	т	P
23PA201009 Pre-Requisite Anti-Requisite	MEDICINAL BIOCHEMISTRY	3	1	_
Co-Requisite	-			

COURSE DESCRIPTION: This course is designed to impart knowledge on the chemical process at

the molecular level in living cells and the chemical aspects of cells in health and illness for diagnos s, treatment, and prevention of diseases. They also understand the metabolic process of biomolecul s and the genetic organization of the mammalian genome with its expression.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1**Demonstrate a thorough understanding of cell biochemical organization, the transport process across cell membranes, and the significance of energy-rich compounds such as A P and cyclic AMP.
- **CO2.** Understand the fundamentals of enzyme activity, including their nomenclature, classification, factors affecting their activity, and their therapeutic and diagnostic applications.
- **CO3.** Explain the metabolic pathways of carbohydrates and proteins, including glycolysis, TCA cycle, gluconeogenesis, and the urea cycle, along with related metabolic disorders and their regulation.
- **CO4.** Analyze lipid and nucleic acid metabolism, including β-oxidation, ketogenesis, fatty ac d biosynthesis, cholesterol metabolism, and the processes of protein synthesis, mutation, and DNA repair mechanisms.
- **CO5.** Describe the coenzyme systems involved in biological oxidation, the electron transport chain, oxidative phosphorylation, and the mechanisms regulating these processes.
- **CO6.** Apply knowledge of clinical chemistry to understand kidney and liver function tests, lip d profile assessments, and immunochemical techniques, including RIA and ELISA, for diagnosing and monitoring various diseases.

#### COURSE CONTENT MODULE 1: INTRODUCTION & ENZYMES

#### (10 Periods)

- Cells and their biochemical organization are part of the transport process across the cell membranes. Energy-rich compounds; ATP, Cyclic AMP and their biological significance.
- Definition; Nomenclature; IUB classification; Factor affecting enzyme activity; Enzyme action; enzyme inhibition. Isoenzymes and their therapeutic and diagnostic applications; Coenzymes and their biochemical role and deficiency diseases.

#### MODULE2: CARBOHYDRATE & PROTEIN METABOLISM

- Glycolysis, Citric acid cycle (TCA cycle), HMP shunt, Glycogenolysis, gluconeogenesis, glycogenesis. Metabolic disorders of carbohydrate metabolism (diabetes mellitus and glycogen storage diseases); Glucose, Galactose tolerance test and their significance; hormonal regulation of carbohydrate metabolism.
- Protein turnover; nitrogen balance; Catabolism of Amino acids (Transamination, deamination & decarboxylation). Urea cycle and its metabolic disorders; production of bile pigments; hyperbilirubinemia, porphyria, jaundice. Metabolic disorder of Amino acids.

#### MODULE3: LIPID & NUCLEIC ACID METABOLISM

- Oxidation of saturated (β-oxidation); Ketogenesis and ketolysis; biosynthesis of fatty acids, lipids; metabolism of cholesterol; Hormonal regulation of lipid metabolism. Defective metabolism of lipids (atherosclerosis, fatty liver, hypercholesterolemia).
- Metabolism of purine and pyrimidine nucleotides; Protein synthesis; Genetic code; inhibition of protein synthesis; mutation and repair mechanism; DNA replication (semiconservative /onion peel models) and DNA repair mechanism.

#### MODULE 4: BIOLOGICAL OXIDATION

• Coenzyme system involved in biological oxidation. Electron transport chain (its mechanism in energy capture; regulation and inhibition); Uncouplers of ETC; Oxidative phosphorylation.

#### MODULE 5: CLINICAL CHEMISTRY AND KIDNEY FUNCTION TESTS (10 Periods)

- **Introduction to clinical chemistry:** Cell; composition; malfunction; Roll of the clinical chemistry laboratory
- **The kidney function tests:** Role of the kidney; Laboratory tests for normal function include Tests for NPN constituents. (Creatinine / urea clearance, determination of blood and urine creatinine, urea and uric acid), Urine concentration test, Urinary tract calculi. (stones)
- **Electrolytes:** Body water, compartments, water balance, and electrolyte distribution. Determination of sodium, calcium potassium, chlorides, and bicarbonates in the body fluids.

#### MODULE 6: LIVER FUNCTION, LIPID PROFILE, AND IMMUNOCHEMICAL TECHNIQUES

- Liver function tests: Physiological role of liver, metabolic, storage, excretory, protective, circulatory functions and function in blood coagulation, Test for hepatic dysfunction-Bile pigments metabolism
- **Hepatic function tests:** Serum bilirubin, urine bilirubin, and urine urobilinogen. Dye tests of excretory function. Tests are based on abnormalities of serum proteins.
- **Lipid profile tests:** Lipoproteins, composition, functions. Determination of serum lipids, total cholesterol, HDL cholesterol, LDL cholesterol, and triglycerides.
- **Immunochemical techniques**: for determination of hormone levels and protein levels in serum for endocrine diseases and infectious diseases. Radio immuno assay (RIA) and Enzyme Linked Immuno Sorbent Assay (ELISA).

Т

23PA201010	PHARMACEUTICAL ORGANIC CHEMISTRY	3	1	-
<b>Pre-Requisite</b>	-			
Anti-Requisite	-			
Co-Requisite	-			

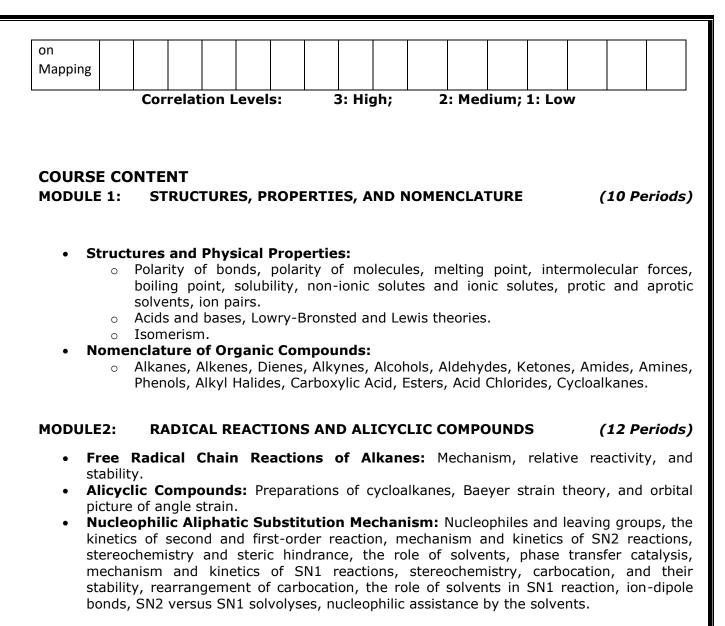

**COURSE DESCRIPTION:** This course provides an in-depth understanding of organic chemistry, covering molecular structure, bond polarity, intermolecular forces, solubility, and nomenclature. Students will explore free radical chain reactions, alicyclic compound preparations, nucleophilic substitution, dehydrohalogenation, addition reactions, and resonance theory. The course all o examines electrophilic aromatic substitution, condensation, rearrangement reactions, nucleophilic aromatic substitution, oxidation-reduction reactions, and the preparation, purity testing, assay, and medicinal uses of essential official compounds.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1**Understand and explain the structural and physical properties of organic molecules, including bond polarity, intermolecular forces, solubility, and isomerism. Demonstrate proficiency n the nomenclature of various classes of organic compounds.
- **CO2.** Analyze the mechanisms and stability of free radical chain reactions in alkanes, and descrile the properties and preparations of alicyclic compounds, including the Baeyer strain theory.
- **CO3.** Evaluate the mechanisms and kinetics of nucleophilic aliphatic substitution reactions (SI 1 and SN2), considering factors such as nucleophiles, leaving groups, and solvents.
- **CO4.** Investigate and compare the mechanisms of dehydrohalogenation and electrophilic and fr e radical addition reactions, applying concepts such as Markovnikov rule, peroxide effect, aid cycloaddition.
- **CO5.** Apply the theory of resonance to organic molecules, analyze the effects of substituents in electrophilic aromatic substitution reactions, and understand the concepts of hyperconjugation and resonance stabilization.
- **CO6.** Explain and apply the mechanisms of various condensation and rearrangement reactions, nucleophilic aromatic substitution, and oxidation-reduction reactions. Understand t e preparation, purity tests, assay, and medicinal uses of key official compounds.

#### CO-PO-PSO Mapping Table:

#### MODULE3: ELIMINATION REACTIONS AND ADDITIONS

# **Dehydrohalogenation of Alkyl Halides:** 1,2-elimination, kinetics, E2 and E1 mechanism, elimination via carbocation, evidence for E2 mechanism, absence of rearrangement isotope effect, absence of hydrogen exchange, the element effect, orientation and reactivity, E2 versus E1, elimination versus substitution, dehydration of

alcohol, ease of dehydration, acid catalysis, reversibility, orientation.
 Electrophilic and Free Radicals Addition: Reactions at carbon-carbon double bond, electrophile, hydrogenation, the heat of hydrogenation and stability of alkenes, Markovnikov rule, the addition of hydrogen halides, the addition of hydrogen bromides, peroxide effect, electrophilic addition, mechanism, rearrangement, absence of hydrogen exchange, orientation, and reactivity, addition of halogen, mechanism, halohydrin formation, mechanism of free radicals addition, mechanism of peroxide-initiated addition of hydrogen bromide, orientation of free radical addition, additions of carbene to alkene, cycloaddition reactions.

#### MODULE 4: RESONANCE AND DOUBLE BONDS

# **Carbon-Carbon Double Bond as Substituents:** Free radical halogenations of alkenes, comparison of free radical substitution with free radical addition, free radical substitution in alkenes, orientation and reactivity, allylic rearrangements.

• **Theory of Resonance:** Allyl radical as a resonance hybrid, stability, orbital picture, resonance stabilization of allyl radicals, hyperconjugation, allyl cation as a resonance hybrid, nucleophilic substitution in the allylic substrate, SN1 reactivity, allylic

(13 Periods)

(15 Periods)

rearrangement, resonance stabilization of allyl cation, hyperconjugation, nucleophilic substitution in allylic substrate, SN2 nucleophilic substitution in the vinylic substrate, vinylic cation, stability of conjugated dienes, resonance in alkenes, hyperconjugation, ease of formation of conjugated dienes, orientation of elimination, electrophilic addition to conjugated dienes, 1,4-addition, 1,2-versus 1,4-addition, rate versus equilibrium, orientation and reactivity of free radical addition to conjugated dienes.

• **Electrophilic Aromatic Substitution:** Effect of substituent groups, determination of orientation, determination of relative reactivity, classification of substituent groups, mechanism of nitration, sulphonation, halogenation, Friedel-Crafts alkylation, Friedel-Crafts acylation, reactivity and orientation, activating and deactivating ortho-, para-, meta-directing groups, electron release via resonance, effect of halogen on electrophilic aromatic substitution in alkyl benzene, side chain halogenation of alkyl benzene, resonance stabilization of benzyl radical.

#### MODULE 5: NUCLEOPHILIC REACTIONS AND CONDENSATIONS (15 Periods)

- **Nucleophilic Addition Reaction:** Mechanism, ionization of carboxylic acids, acidity constants, acidity of acids, structure of carboxylate ions, effect of substituents on acidity, nucleophilic acyl substitution reaction, conversion of acid-to-acid chloride, esters, amides, and anhydrides. Role of carboxyl group, comparison of alkyl nucleophilic substitution with acyl nucleophilic substitution.
- **Mechanisms of Condensation and Rearrangement Reactions:** Aldol condensation, Claisen condensation, Cannizzaro reaction, crossed Aldol condensation, crossed Cannizzaro reaction, benzoin condensation, Perkin condensation, Knoevenagel reaction, Reformatsky reaction, Wittig reaction, Michael addition.
- **Hoffman Rearrangement and Other Key Reactions:** Migration to electron-deficient nitrogen, Sandmeyer's reaction, basicity of amines, diazotisation and coupling, acidity of phenols, Williamson synthesis, Fries rearrangement, Kolbe reaction, Reimer-Tiemann reaction.

#### MODULE 6: AROMATIC SUBSTITUTION, REDOX, AND OFFICIAL (10 Periods) COMPOUNDS

- **Nucleophilic Aromatic Substitution:** Bimolecular displacement mechanisms, orientation, comparison of aliphatic nucleophilic substitution with that of aromatic.
- Oxidation and Reduction Reactions.
- **Study of Official Compounds:** Preparation, test for purity, assay, and medicinal uses of Chlorbutol, Dimercaprol, Glyceryl trinitrate, Urea, Ethylene diamine dihydrate, Vanillin, Paraldehyde, Ethylene chloride, Lactic acid, Tartaric acid, Citric acid, Salicylic acid, Aspirin, Methyl salicylate, Ethyl benzoate, Benzyl benzoate, Dimethyl phthalate, Sodium lauryl sulfate, Saccharin sodium, Mephensin.

Course Code	Course Title	L	т	P
23PA201011 Pre-Requisite Anti-Requisite Co-Requisite	PHARMACEUTICAL INORGANIC CHEMISTRY	2	1	-

**COURSE DESCRIPTION:** This course covers fundamental principles of pharmaceutical analyss, including error identification, volumetric, redox, non-aqueous, precipitation, and complexometric titrations. Students will learn about indicators, gravimetry, limit tests, medicinal gases, buffers, cathartics, electrolyte replenishers, trace elements, pharmaceutical aids, dental products, miscellaneous compounds, and radiopharmaceuticals, ensuring comprehensive pharmaceutical knowledge.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1**Understand and identify errors in pharmaceutical analysis, and conduct accurate volumet ic analysis and acid-base titrations.
- **CO2.** Understand and identify errors in pharmaceutical analysis, and conduct accurate volumetric analysis and acid-base titrations.
- **CO3.** Carry out complexometric titrations, apply the theory of indicators, and perform gravimetric analysis.
- **CO4.** Carry out complexometric titrations, apply the theory of indicators, and perform gravimet ic analysis.
- **CO5.** Execute limit tests, understand the significance of medicinal gases, and evaluate the use of acidifiers and antacids in formulations.
- **CO6.** Explain the use and mechanism of cathartics, electrolyte replenishers, and understand t e role of essential trace elements and antimicrobials.

#### **COURSE DESCRIPTION:**

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1** solve algebraic problems using determinants and matrices, understanding their applications in various mathematical contexts.
- CO2. demonstrate proficiency in solving problems related to triangle sides, angles, and geometric shapes, including points, lines, circles, and parabolas.
- CO3. apply differential calculus concepts to calculate limits and differentiate functions, including composite, parametric, and trigonometric functions.
- use successive differentiation, Leibnitz's theorem, partial differentiation, and Euler's theorem CO4. to analyze and solve complex calculus problems involving homogeneous functions.
- CO5. compute definite integrals, apply integration methods such as substitution and by parts, and understand the properties of definite integrals.
- solve various differential equations and use Laplace transforms to analyze elementary CO6. functions, leveraging properties of linearity and shifting.

#### **Co-Requisite**

**COURSE DESCRIPTION:** Differentiate between various animal phyla and classes, including Aves, and apply knowledge of animal tissues and cell structures to specific studies of representati e species.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1**Identify and classify various plant tissues, their structures, and functions, and understand the general organization and classification of plants and plant kingdoms.
- **CO2.** Analyze and describe plant morphology, including roots, stems, leaves, and their modifications, as well as inflorescence, pollination, and the morphology of fruits and seeds.
- **CO3.** Understand plant physiology and taxonomy, including the classification of key plant families like Leguminosae, Umbelliferae, and Solanaceae, and study various fungi and bacteria.
- **CO4.** Examine animal cell structures and tissues, and perform detailed studies on amphibiars, focusing on frogs and other key classes such as Pisces and Reptiles.
- **CO5.** Study the general organization of mammals, understanding their structure and function, aid explore the characteristics and identification of poisonous animals.
- **CO6.** Differentiate between various animal phyla and classes, including Aves, and apply knowled e of animal tissues and cell structures to specific studies of representative species.

# COURSE CONTENT MODULE 1: INTRODUCTION TO PLANTS AND PLANT CLASSIFICATION

(12 Periods)

- Introduction
- General organization of plants and its inclusions
- Plant tissues

Plant kingdom and its classification	
MODULE 2: PLANT MORPHOLOGY AND PHYSIOLOGY	(12 Periods)
<ul> <li>Morphology of plants</li> <li>Root, Stem, Leaf and Its modifications</li> <li>Inflorescence and Pollination of flowers</li> <li>Morphology of fruits and seeds</li> <li>Plant physiology</li> </ul>	
MODULE 3: PLANT TAXONOMY AND STUDY OF FUNGI	(15 Periods)
<ul> <li>Taxonomy of Leguminosae, Umbelliferae, Solanaceae, Liliaceae, Rubiaceae</li> </ul>	Zingiberaceae,
<ul> <li>Study of Fungi, Yeast, Penicillin and Bacteria</li> </ul>	
MODULE 4: STUDY OF ANIMAL CELLS AND TISSUES	(12 Periods)
<ul><li>Study of Animal cell</li><li>Study animal tissues</li></ul>	
MODULE 5: DETAILED STUDY OF AMPHIBIANS AND REPTILES	(12 Periods)
<ul><li>Detailed study of frog</li><li>Study of Pisces, Reptiles</li></ul>	
MODULE 6: STUDY OF AVES, MAMMALS, AND POISONOUS ANIMALS	(12 Periods)
<ul> <li>Study of Aves</li> <li>General organization of mammals</li> <li>Study of poisonous animals</li> </ul>	

Total Periods: 75

#### **Co-Requisite**

#### **COURSE DESCRIPTION:**

Upon completion of this course the student should be able to understand the structure and functions of the human body and understand homeostasis mechanisms in our body and also learn about coordinated working pattern of different organs with each other.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Identify and analyze the numerous tissues and bones that comprise the human body's systems. Apply appropriate tools and analyze numerous hematological variables, record blood pressure of human vitals.
- **CO2.** Comprehend the structure and functions of special sense organs, nervous system, digestive system, respiratory system, cardiovascular systems, urinary system and reproductive systems and endocrine system, family planning appliances and pregnancy diagnosis test. Perform the various experiments related to various nerves, temperature and homeostatic mechanisms of the human body.
- **CO3.** Work as an individual and as a member of a team to solve problems with effective communications

#### **CO-PO-PSO Mapping Table:**

#### **COURSE CONTENT**

- 1. Study of tissues of human body
- (a) Epithelial tissue.
- (b) Muscular tissue.

- 2. Study of tissues of human body
- (a) Connective tissue.
- (b) Nervous tissue.
- 3. Study of appliances used in hematological experiments.
- 4. Determination of W.B.C. count of blood.
- 5. Determination of R.B.C. count of blood.
- 6. Determination of differential count of blood.
- 7. Determination of
- (a) Erythrocyte Sedimentation Rate.
- (b) Hemoglobin content of Blood.
- (c) Bleeding time & Clotting time.
- 8. Determination of
- (a) Blood Pressure.
- (b) Blood group.
- 9. Study of various systems with the help of charts, models & specimens
- (a) Skeleton system part I-axial skeleton.
- (b) Skeleton system part II- appendicular skeleton.
- (c) Cardiovascular system.
- (d) Respiratory system.
- (e) Digestive system.
- (f) Urinary system.
- (g) Nervous system.
- (h) Special senses.
- (i) Reproductive system.
- 10. Study of different family planning appliances.
- 11. To perform pregnancy diagnosis test.
- 12. Study of appliances used in experimental physiology.
- 13. To record simple muscle curve using gastroenemius sciatic nerve preparation.
- 14. To record simple summation curve using gastroenemius sciatic nerve preparation.
- 15. To record simple effect of temperature using gastroenemius sciatic nerve preparation.
- 16. To record simple effect of load & after load using gastroenemius sciatic nerve preparation.
- 17. To record simple fatigue curve using gastroenemius sciatic nerve preparation.

\_

Co-Requisite

**COURSE DESCRIPTION:** This course is designed to acquire hands on experience in formulating various dosage forms and interpret incompatibilities in perceptions.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Demonstrate the preparations and evaluations of Liquid dosage forms
- **CO2.** Demonstrate the preparations and evaluations of Biphasic Liquid dosage forms and Evaluation
- **CO3.** Demonstrate the preparation evaluation and packaging of different types of Powders and Suppositories
- **CO4.** Apply the basic concept of incompatibility and interpret the concept in problem solving.
- CO5. Work independently and communicate effectively in oral and written forms

### **COURSE CONTENT**

I. Introduction to the various laboratory techniques through demonstration involving synthesis of the following compounds (at least 8 compounds to be synthesized):

- 1. Acetanilde / aspirin (Acetylation)
- 2. Benzanilide / Phenyl benzoate (Benzoylation)
- 3. P-bromo acetanilide / 2,4,6 tribromo aniline (Bromination)
- 4. Dibenzylidene acetone (Condensation)
- 5. 1-Phenylazo-2-napthol (Diazotisation and coupling)
- 6. Benzoic acid / salicylic acid (Hydrolysis of ester)
- 7. M-dinitro benzene (Nitration)

8. 9, 10 – Antharaquinone (Oxidation of anthracene) / preparation of benzoic acid from toluene or benzaldehyde

- 9. M-phenylene diamine (Reduction of M-dinitrobenzene) / Aniline from nitrobenzene
- 10. Benzophenone oxime
- 11. Nitration of salicylic acid
- 12. Preparation of picric acid
- 13. Preparation of O-chlorobenzoic acid from O-chlorotolune
- 14. Preparation of cyclohexanone from cyclohexanol

II. Identification of organic compounds belonging to the following classes by : Systematic qualitative organic analysis including preparation of derivatives Phenols, amides, carbohydrates, amines, carboxylic acids, aldehyde and ketones, Alcohols, esters, hydrocarbons, anilides, nitrocompounds.

III. Introduction to the use of stereo models: Methane, Ethane, Ethylene, Acetylene, Cis alkene, Trans alkene, inversion of configuration.

#### **COURSE CONTENT**

#### LIST OF EXPERIMENTS.

- 1. Limit test (6 exercises)
- a. Limit test for chlorides
- b. Limit test for sulphates
- c. Limit test for iron
- d. Limit test for heavy metals
- e. Limit test for arsenic
- f. Modified limit tests for chlorides and sulphates.

#### 2. Assays (10 exercises)

- a. Ammonium chloride- Acid-base titration
- b. Ferrous sulphate- Cerimetry
- c. Copper sulpahte- Iodometry
- d. Calcium gluconate- Complexometry
- e. Hydrogen peroxide Permanganometry
- f. Sodium benzoate Nonaqueous titration
- g. Sodium chloride Modified volhard's method
- h. Assay of KI KIO3 titration
- i. Gravimetric estimation of barium as barium sulphate
- j. Sodium antimony gluconate or antimony potassium tartarate
- 3. Estimation of Mixtures
- a. Sodium hydroxide and sodium carbonate
- b. Boric acid and borax
- c. Oxalic Acid and Sodium oxalate

#### 4. Test for identity (Any three exercises)

- a. Sodium bicorbonate
- b. Barium sulphate
- c. Ferrous sulphate
- d. Potassium chloride.

#### 5. Test for purity (Any two exercises)

- a. Swelling power in Bentonite
- b. Acid neutralising capacity in aluminium hydroxide gel
- c. Ammonium salts in potash alum
- d. Adsorption power heavy Kaolin
- e. Presence of Iodates in KI

#### 6. Preparations (Any two exercises)

- a. Boric acids
- b. Potash alum
- c. Calcium lactate
- d. Magnesium suphate

	CELL INJURY AND INFLAMMATION	(10 Pariada)
Module 1:		(10 Periods)
	ples of cell injury and Adaptation	
,	athogenesis and morphology of cell injury ities in lipoproteinaemia, glycogen infiltration and glycoge	n infiltration
,	gen infiltration and glycogen storage diseases.	
Inflammatio		
	esis of acute inflammation, Chemical mediators in infla	mmation,
	f chronic inflammation	
b) Repairs of	wounds in the skin, factors influencing healing of wounds.	
Module 2:	IMMUOLOGICAL DISEASES	(15 Periods)
1. Diseases	J of Immunity	
a) Introducti	on to T and B cells	
b) MHC prote	eins or transplantation antigens	
c) Immune t		
	sitivity: Hypersensitivity type I, II, III, IV, Biological signifi-	cance,
- Autoimmu	e to food, chemicals and drugs	
	· autoimmunity, Classifications of autoimmune diseases	in man
	of autoimmunity, Transplantation and immunologic t	
	ejections, transplantation antigens, mechanism of rej	
allograft.	5, 1, 5, 5, 5	
- Acquired	immune deficiency syndrome (AIDS),	
Amyloidos	sis.	
Madula 2:		(10 Deviede)
	ONCOLOGY	(10 Periods)

**COURSE CONTENT** 

#### Module 1: MICROBIOLOGY

Introduction to the science of microbiology. Major divisions of microbial world and Relationship among them.

Classification of microbes- Different methods of classification of microbes and study of Bacteria, Fungi, virus, Rickettsiae, Spirochetes.

#### GROWTH, ISOLATION AND IDENTIFICATION OF Module 2: MICROBES

Bacterial growth

Nutritional requirements, growth and cultivation of bacteria and virus. Study of different important media required for the growth of aerobic and anaerobic bacteria & fungi. Differential media, enriched media and selective media, maintenance of lab cultures.

Isolation and identification of microbes

Different methods used in isolation and identification of bacteria with emphasis to different staining techniques and biochemical reactions. Counting of bacteria -Total and Viable counting techniques.

#### Module 3: STERILIZATION AND DISINFECTION

Detailed study of different methods of sterilization including their merits and demerits. Sterilization methods for all pharmaceutical products. Detailed study of sterility testing of different pharmaceutical preparations. Brief information on Validation.

Disinfectants- Study of disinfectants, antiseptics, fungicidal and virucidal agents factors affecting their activation and mechanism of action. Evaluation of bactericidal, bacteristatic, virucidal activities, evaluation of preservatives in pharmaceutical preparations.

#### Module 4: IMMUNOLOGY

Immunology- Immunity, Definition, Classification, General principles of natural immunity, Phagocytosis, acquired immunity (active and passive). Antigens, chemical nature of antigens structure and formation of Antibodies, Antigen-Antibody reactions. Bacterial exotoxins and endotoxins. Significance of toxoids in active immunity, Immunization Programme, and importance of booster dose.

#### Module 5: SENSITIVITY TESTS AND DIAGNOSTIC TESTS

Sensitivity testing of microbes

Microbial culture sensitivity Testing: Interpretation of results Principles and methods of different microbiological assays, microbiological assay of Penicillin, Streptomycin and vitamin B2 and B12. Standardization of vaccines and sera.

Diagnostic tests

RESOURCES

Schick's Test, Elisa test, Western Blot test, Southern Blot PCR Widal, QBC, Mantaux Peripheral smear. Study of malarial parasite.

#### **INFECTIOUS DISEASES** Module 6:

Study of infectious diseases: Typhoid, Tuberculosis, Malaria, Cholera, Hepatitis, Meningitis, Syphilis & Gonorrhea and HIV.

Co-Requisite	-			

**COURSE DESCRIPTION:** This course is designed to impart fundamental knowledge on medicinal uses of various naturally occurring drugs history, sources, distribution, method of cultivation, active constituents, medicinal uses, identification tests, preservation methods, substitutes, and adulterants.

COUR	SE OUTCOMES: After successful completion of the course, students will be able to:										
CO1.	Demonstrate a thorough understanding of the fundamentals of Pharmacognosy.										
CO2.	Acquire knowledge about the cultivation, collection, and processing of crude drugs.										
CO3.	Understand the cellular components and their role in the preparation of surgical dressings.										
CO4.	Conduct microscopical and powder analysis of various crude drugs.										
CO5.	Gain a comprehensive understanding of the chemistry, classification, and analysis of carbohydrates and proteins.										
CO6.	Demonstrate knowledge of the sources, extraction methods, chemistry, and analysis of lipids, including a detailed study of oils.

	General Pharmacology	(10 Periods							
a) Intr	oduction, definitions and scope of pharmacology.								
b) Rou	tes of administration of drugs.								
c) Pha	Pharmacokinetics (absorption, distribution, metabolism and excretion).								
d) Pha	rmacodynamics.								
e) Fact	ors modifying drug effects.								
f) Drug	g toxicity - Acute, sub- acute and chronic toxicity.								
g) Pre-	clinical evaluations.								
Module 2:	Autonomic Pharmacology	(15 Periods							
a) Adrener	gic and anti-adrenergic drugs.								
b) Choliner	gic and anti-cholinergic drugs.								
c) Neurom	uscular blockers.								
d) Mydriact	ics and miotics.								
e) Drugs us	sed in myasthenia gravis.								
f) Drugs us	sed in Parkinsonism.								
Module 3:	CARDIOVASCULAR PHARMACOLOGY	(11 Periods)							
a) Anti-l	l nypertensives								
b) Anti-	anginal drugs								
	arrhythmic drugs								
c) Anti-a									
	s used for therapy of Congestive Heart Failure								
d) Drugs	s used for therapy of Congestive Heart Failure s used for hyperlipidaemias								
d) Drugs									
d) Drugs e) Drugs		(14 Periods)

Module 5:	RESPIRATORY PHARMACOLOGY AND AUTOCOIDS	(15 Periods)
Pharmacolog	y of respiratory system	
Bronchodilat	ors, Mucolytics, Expectorants, Antitussives and Nasal decongestants	
Pharmacolog	y of autocoids and their antagonists	
a) Histamin	es and Anti-histaminics.	
b) 5-Hydrox	xytryptamine and its antagonists.	
c) Lipid der	ived autocoids and platelet activating factor.	
Module 6:	ENDOCRINE PHARMACOLOGY	(10 Periods)
Pharmacolog	y of Hormones and Hormone antagonists	
a) Thyroid	and Antithyroid drugs.	
b) Insulin,	Insulin analogues and oral hypoglycemic agents.	
c) Sex horr	nones and oral contraceptives.	
d) Oxytocin	and other stimulants and relaxants.	
	(Tot	al Periods: 75)

Pre-Requisite	-			
Anti-Requisite	-			
Co-Requisite	-			

**COURSE DESCRIPTION:** This course is designed to impart a fundamental knowledge on

formulating different types of dosage forms, their formulation aspects and pharmaceutical calculation involved. Formulate different types of dosage forms; and appreciate the importance of good formulation.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Understand community pharmacy management, including site selection, layout, staff management, legal requirements, and computer usage in business and healthcare.
- **CO2.** Analyze prescriptions and identify medication-related problems, focusing on drug interactions and the principles of pharmaceutical care.

CO3. Analyze prescriptions and identify medication-related problems, focusing on drug interactions and the principles of pharmaceutical care.
 CO4. Master patient counceling techniques and inventory control methods, including.

- **CO4.** Master patient counseling techniques and inventory control methods, including ABC, VED, EOQ, and safety stock.
- **CO5.** Implement community pharmacy services, including essential drugs, medication adherence strategies, health screenings, and OTC medication counseling.
- **CO6.** Educate on health promotion, care for various demographics, communicable diseases, balanced diets, and family planning roles of pharmacists.

#### **COURSE CONTENT**

MODULE 1: COMMUNITY PHARMACY AND ITS MANAGEMENT 12 Pe

**12 Periods** 

Definition, scope, of community pharmacy; Roles and responsibilities of Community

pharmacist.

Community pharmacy management

- a) Selection of site, Space layout, and design.
- b) Staff, Materials- coding, stocking.
- c) Legal requirements.
- d) Maintenance of various registers.
- e) Use of Computers: Business and health care softwares.

#### MODULE 2: PRESCRIPTION AND PHARMACEUTICAL CARE

**08** Periods

Parts of prescription, legality & identification of medication related problems like drug interactions.

Definition and Principles of Pharmaceutical care.

#### MODULE 3: PATIENT COUNSELING AND INVENTORY CONTROL

**08** Periods

Patient counseling

Definition, outcomes, various stages, barriers, Strategies to overcome barriers, Patient information leaflets- content, design, & layouts, advisory labels.

Inventory control

Definition, various methods of Inventory Control ABC, VED, EOQ, Lead time, safety stock.

# MODULE 4: COMMUNITY PHARMACY SERVICES

12 Periods

Essential drugs concept

Essential Drugs concept and Rational Drug Therapy - Role of communitypharmacist. Patient medication adherence

Definition, Factors affecting medication adherence, role of pharmacist inimproving the adherence.

Health screening services

Definition, importance, methods for screening, Blood pressure/ blood sugar/ lung

function and Cholesterol testing

OTC medication

Definition, OTC medication list & Counselling.

Code of ethics for community pharmacists.

MODULE 5:	HEALTH EDUCATION 12 Periods									
WHO Definition of health and health promotion, care for children, pregnant & breast- feeding women, and geriatric patients.										
and preventio	Commonly occurring Communicable Diseases, causative agents, Clinical presentations and prevention of communicable diseases – Tuberculosis, Hepatitis, Typhoid, Amoebiasis, Malaria, Leprosy, Syphilis, Gonorrhea and AIDS.									
Balance diet,	and treatment & prevention of deficiency disorders									
Family plannir	ng – role of pharmacist.									
MODULE 6:	MINOR AILMENTS MANAGEMENT	08 Periods								
Relevant pathophysiology, common drug therapy to Pain, GI disturbances (Nausea,										
Vomiting, Dys infestations.	spepsia, diarrhea and constipation), Pyrexia, Opthalmic symp	ptoms, worm

Pre-Requisite								
Anti-Requisite	-							
Co-Requisite	-							
<b>COURSE DESCRIPTION:</b> This course is designed to impart knowledge and skills necessary								

for imparting safe and effective use of medicines in patients. They also learn pharmacotherapy of diseases with etiopathogenesis, diagnostic criteria and drug therapy management practices. This also helps to understand and practice evidence-based medicine during disease management.

COURS	<b>COURSE OUTCOMES:</b> After successful completion of the course, students will be able to:						
CO1	Define rational drug use, understand essential drug concepts, and evaluate the						
	pharmacist's role in drug formulation and management effectively.						
CO2	Assess and manage conditions like hypertension, heart failure, angina, myocardial infarction, hyperlipidemia, and arrhythmias using appropriate cardiovascular treatments.						
CO3	Interpret pulmonary function tests and manage asthma, chronic obstructive airway disease, and drug-induced pulmonary diseases with effective therapeutic strategies.						
CO4	Diagnose and treat ophthalmic conditions such as glaucoma and conjunctivitis, differentiating between viral and bacterial causes and appropriate treatments.						
CO5	Manage endocrine disorders including diabetes, thyroid diseases, osteoporosis, and hormone therapies, including the use of oral contraceptives.						
CO6	Apply prescribing guidelines for pediatric, geriatric, pregnant, and breastfeeding patients, ensuring safe and appropriate medication use across different populations.

#### **EXPERIMENTAL LEARNING**

- 1 Study of apparatus used in experimental microbiology
- 2 Sterilization of glass wares. Preparation of media and sterilization.
- 3 Staining techniques Simple staining; Gram's staining; Negative staining
- 4 Study of motility characters.
- 5 Enumeration of micro-organisms (Total and Viable)
- 6 Study of the methods of isolation of pure culture.
- 7 Bio chemical testing for the identification of micro-organisms.
- 8 Cultural sensitivity testing for some micro-organisms.

- 9 Sterility testing for powders and liquids.
- 10 Determination of minimum inhibitory concentration.
- 11 Microbiological assay of antibiotics by cup plate method.
- 12 Microbiological assay of vitamins by Turbidimetric method
- 13 Determination of RWC.
- 14 Diagnostic tests for some common diseases, Widal, malarial parasite.

- 10 Macro, powder, and microscopic study of Fennel.
- 11 Macro, powder, and microscopic study of Coriander.
- 12 Macro, powder, and microscopic study of Isapgol.
- 13 Macro, powder, and microscopic study of Nux vomica.
- 14 Macro, powder, and microscopic study of Rauwolfia.
- 15 Macro, powder, and microscopic study of Liquorice.
- 16 Macro, powder, and microscopic study of Ginger.
- 17 Macro, powder, and microscopic study of Podophyllum.
- 18 Determination of Iodine value.
- 19 Determination of Saponification value and unsaponifiable matter.
- 20 Determination of ester value.
- 21 Determination of Acid value.
- 22 Chemical tests for Acacia.
- 23 Chemical tests for Tragacanth.
- 24 Chemical tests for Agar.
- 25 Chemical tests for Starch.
- 26 Chemical tests for Lipids. (castor oil, sesame oil, shark liver oil, bees wax)
- 27 Chemical tests for Gelatin.

Co-Requisite	-			
	<b>DN:</b> This course is designed to impart knowledge ar ovide pharmaceutical care to the patients using SOAP r		s in de	veloping

COUR	SE OUTCOMES: After successful completion of the course, students will be able to:
CO1.	Demonstrate the treatment goals to the patient;
CO2.	Analyze patient outcome in selection, monitoring and initiation of drug therapies;
CO3.	Provide feedback to clinicians regarding drug related needs.
CO4.	Work independently and in teams to solve problems with effective communications

#### **CO-PO Mapping Table:**

#### LIST OF EXPERIMENTS:

Hospital postings for a period of at least 50 Periods is required to understand the principles and practice involved in ward round participation and clinical discussion on selection of drug therapy. Students are required to maintain a record of 15 cases observed in the ward and the same should be submitted at the end of the course for evaluation. Each student should present at least two medical cases they have observed and followed in the wards Assessment of drug interactions in the given prescriptions

#### **Assignments:**

Students are required to submit written assignments on the topics given to them. Topics allotted should cover recent developments in drug therapy of various diseases.

A minimum of THREE assignments [1500–2000words] should be submitted for evaluation. Format of the assignment: Minimum & Maximum number of pages Reference(s) shall be included at the end. Assignment can be a combined presentation at the end of the academic year It shall be computer draft copy Name and signature of the student Time allocated for presentation may be 8+2 Min.

COURSE DESCRI	PTION:					

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- CO1. Understand the classification, mechanism of drug action and its relevance in the treatment of different diseases.
- CO2. Understand the therapeutic applications and adverse effects of drugs including the molecular basis of the mechanisms of action, learning principles of prescribing practices etc.
- **CO3.** Appreciate the importance of pharmacology subject as a basis of therapeutics, and correlate and apply the knowledge therapeutically.
- **CO4.** Apply the knowledge of gene study in the treatment of various diseases.

### **CO-PO-PSO Mapping Table:**

**Correlation Levels:** 

3: High;

2: Medium; 1: Low

# **COURSE CONTENT**

# Module 1: Pharmacology of Drugs

Pharmacology of Drugs acting on Blood and blood forming agents

- a) Anticoagulants
- b) Thrombolytics and antiplatelet agents
- c) Haemopoietics and plasma expanders

# Pharmacology of drugs acting on the Renal System

- a) Diuretics
- b) Antidiuretics.

# Drugs acting on GIT:

- a) Drugs for peptic ulcer and gastric acidity
- b) Anti-emetics
- c) Drugs for constipation, diarrhea, Inflammatory Bowel Disease

# Module 2: Chemotherapy

(15 Periods)

- Introduction
- Sulphonamides and co-trimoxazole
- Penicillins and Cephalosporins
- Tetracyclines and Chloramphenicol
- Macrolides, Aminoglycosides, Polyene& Polypeptide antibiotics
- Quinolines and Fluroquinolones
- Antifungal antibiotics
- Antiviral agents
- Chemotherapy of tuberculosis and leprosy
- Chemotherapy of Malaria
- Chemotherapy of protozoal infections (amoebiasis, Giardiasis)
- Pharmacology of Anthelmintic drugs
- Chemotherapy of cancer (Neoplasms)

# Module 3: Immunopharmacology

# (07 Periods)

**Immunopharmacology:** Pharmacology of immunosuppressants and stimulants

Principles of Animal toxicology: Acute, sub-acute, and chronic toxicity

# Module 4: The dynamic cell: The structures and (15 Periods) functions of the components of the cell

a) Cell and macromolecules: Cellular classification, subcellular organelles, macromolecules,

large macromolecular assemblies

b) Chromosome structure: Pro and eukaryotic chromosome structures, chromatin structure, genome complexity, the flow of genetic information.

c) DNA replication: General, bacterial, and eukaryotic DNA replication.

d) The cell cycle: Restriction point, cell cycle regulators, and modifiers.

e) Cell signaling: Communication between cells and the environment, ion channels,

signal transduction pathways (MAP kinase, P38 kinase, JNK, Ras and PI3-kinase

pathways, biosensors.

(15 Periods)

#### Module 5: The Gene: Genome structure and function

(20 Periods)

- Gene structure: Organization and elucidation of genetic code.
- Gene expression: Expression systems (pro and eukaryotic), genetic elements that control gene expression (nucleosomes, histones, acetylation, HDACS, DNA binding protein families.
- Transcription and Transcription factors: Basic principles of transcription in pro and eukaryotes. Transcription factors that regulate transcription in pro and eukaryotes.
- RNA processing: rRNA, tRNA, and mRNA processing.
- Protein synthesis: Mechanisms of protein synthesis, initiation in eukaryotes, translation control and post-translation events
- Altered gene functions Mutations, deletions, amplifications, LOH, translocations, trinucleotide repeats, and other genetic abnormalities. Oncogenes and tumor suppressor genes. The gene sequencing, mapping, and cloning of human disease genes. Introduction to gene therapy and targeting.
- Recombinant DNA technology: principles. Processes (gene transfer technology) and applications.

#### Total Periods: 75

COURSE DESCRI	PTION:				

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Understand the cGMP aspects in the pharmaceutical industry & the scope of quality certifications applicable to pharmaceutical industries. Appreciate the importance or documentation.
- **CO2.** Understand the chromatographic separation and analysis of drugs.
- **CO3.** Carry out various volumetric and electrochemical titrations.
- **CO4.** Understand the interaction of matter with electromagnetic radiations and its applications in drug analysis Perform quantitative & qualitative analysis of drugs using various analytica instruments.

#### **CO-PO-PSO Mapping Table:**

**Correlation Levels:** 

3: High;

2: Medium; 1: Low

#### **COURSE CONTENT**

#### Module 1: Quality Assurance

- Introduction, sources of quality variation, control of quality variation.
- Concept of statistical quality control.
- Validation methods- quality of equipment, validation of equipment, and validation of analytical instruments and calibration.
- GLP, ISO 9000.
- Total quality management, quality review, and documentation.
- ICH- international conference for harmonization guidelines.
- Regulatory control.

#### Module 2: Chromatography

- Introduction, history, classification, separation techniques, choice of methods. The following techniques be discussed with relevant examples of pharmaceutical products involving principles and techniques of separation of drugs from excipients.
- **Column Chromatography:** Adsorption column chromatography, Operational technique, frontal analysis and elution analysis. Factors affecting column efficiency, applications and partition chromatography.
- **TLC:** Introduction, principle, techniques, Rf value and applications.
- **PC:** Introduction, principle, types of paper chromatography, preparation techniques, development techniques, applications.
- **Ion-exchange chromatography:** Introduction, principles, types of ion exchange synthetic resins, physical properties, factors affecting ion exchange, methodology and applications.
- **HPLC:** Introduction, theory, instrumentation, and applications.
- **HPTLC:** Introduction, theory, instrumentation, and applications.
- **Gas Chromatography:** Introduction, theory, instrumentation-carrier gases, types of columns, stationary phases in GLC & GSC. DetectorsFlame ionization detectors, electron capture detector, thermal conductivity detector. Typical gas chromatogram, derivatisation techniques, programmed temperature gas chromatography, applications.
- **Electrophoresis:** Principles of separation, equipment for paper and gel electrophoresis, and application. i. Gel filtration and affinity chromatography: Introduction, technique, applications.

#### Module 3: Electrometric Methods

(15 Periods)

(15 Periods)

(15 Periods)

- **Electrometric Methods:** Theoretical aspects, instrumentation, interpretation of data/spectra and analytical applications be discussed on the following topics.
- **Potentiometry:** Electrical potential, electrochemical cell, reference electrodes, indicator electrodes, measurement of potential and pH, construction and working of electrodes, Potentiometric titrations, methods of detecting endpoint, Karl Fischer titration.
- **Conductometry:** Introduction, conductivity cell, conductometric titrations and applications.
- **Polarography**: Instrumentation, DME, residual current, diffusion current and limiting current, polarographic wave, Ilkovic's equation, Effect of oxygen on polarographic wave, Polarographic maxima and suppressors and applications.
- **Amperometric Titrations:** Introduction, types of electrodes used, reference and indicator electrode, instrumentation, titration procedure, advantages and disadvantages of Amperometry over potentiometry. Pharma applications.

#### Module 4: Spectroscopy

#### (15 Periods)

- **Spectroscopy:** Theoretical aspects, instrumentation, elements of interpretation of data/spectra, and application of analytical techniques be discussed on
- Absorption Spectroscopy: Theory of electronic, atomic, and molecular spectra. Fundamental laws of photometry, Beer-Lambert's Law, application and its deviation, limitation of Beer law, application of the law to single and multiple component analysis, measurement of equilibrium constant and rate constant by spectroscopy. Spectra of isolated chromophores, auxochromes, bathochromic shift, hypsochromic shift, hyperchromic and hypochromic effect, the effect of solvent on absorption spectra, molecular structure, and infrared spectra. Instrumentation – Photometer, U.V.-Visible spectrophotometer – sources of U.V.-Visible radiations, collimating systems, monochromators, samples cells and following detectors-Photocell, Barrier layer cell, Phototube, Diode array, applications of U.V.-Visible spectroscopy in pharmacy and spectrophotometric titrations.
- **Infrared Spectroscopy**: Vibrational transitions, frequency structure correlations, Infrared absorption bands, Instrumentation–IR spectrometer – sources of IR, Collimating systems, monochromators, sample cells, sample handling in IR spectroscopy and detectors– Thermocouple, Golay Cells, Thermistor, Bolometer, Pyroelectric detector, Applications of IR in pharmacy
- **Fluorimetric Analysis:** Theory, luminescence, factors affecting fluorescence, quenching. Instrumentation, Applications, fluorescent indicators, the study of pharmaceutically important compounds estimated by fluorimetry.
- **Flame Photometry:** Theory, nebulization, flame and flame temperature, interferences, flame spectrometric techniques, instrumentation and pharmaceutical applications.
- **Atomic Absorption Spectrometry**: Introduction, Theory, types of electrodes, instrumentation, and applications.
- Atomic Emission Spectroscopy: Spectroscopic sources, atomic emission spectrometers, photographic and photoelectric detection.

#### Module 5: NMR & ESR

#### (15 Periods)

- NMR & ESR (introduction only): Introduction, theoretical aspects and applications. f. Mass Spectroscopy: (Introduction only) – Fragmentation, types of ions produced mass spectrum and applications.
- Polarimetry: (Introduction only) Introduction to optical rotatory dispersion, circular dichroism, polarimeter.

 X-RAY Diffraction: (Introduction only) – Theory, reciprocal lattice concept, diffraction patterns, and applications. i. Thermal Analysis: Introduction, instrumentation, applications, and DSC and DTA.

Total Periods: 75

#### **COURSE DESCRIPTION:**

This course exposes the student to several important legislations related to the profession of pharmacy in India. The Drugs and Cosmetics Act, along with its amendments are the core of this course. Other acts, which are covered, include the Pharmacy Act, dangerous drugs, medicinal and toilet preparation Act etc. Besides this the new drug policy, professional ethics, DPCO, patent and design Act will be discussed.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Understand laws and procedures regarding manufacturing and sale of drugs and dosage forms and acquire knowledge of various schedules and ethical responsibilities of registered pharmacist.
- **CO2.** Practice the Professional ethics;
- CO3. Understand the various concepts of the pharmaceutical legislation in India;
- **CO4.** Know the various parameters in the Drug and Cosmetic Act and rules;
- **CO5.** Know the Drug policy, DPCO, Patent and design act;
- **CO6.** Understand the labeling requirements and packaging guidelines for drugs and cosmetics;
- **CO7.** Be able to understand the concepts of Dangerous Drugs Act, Pharmacy Act and Excise duties Act

#### **CO-PO-PSO Mapping Table:**

#### COURSE CONTENT

#### Pharmaceutical Legislations and ethics Module 1

(12 Periods) A brief review Principle and Significance of professional ethics. Critical study of the code of pharmaceutical ethics drafted by PCI.

#### Module 2 Drugs and Cosmetics Act, 1940, and rules 1945

Objectives, Legal definition, Study of Schedule's with reference to Schedule B, C&C1, D, E1, F&F1, F2, F3, FF, G, H, J, K, M, N, P, R, V, W, X, Y. Sales, Import, labeling and packaging of Drugs and Cosmetics Provisions Relating to Indigenous Systems. Constitution and Functions of DTAB, DCC, CDL. Qualification and duties –Govt. analyst and Drugs Inspector

#### Module 3 Pharmacy Act –1948.

(06Periods) Objectives Legal Definitions, General Study, Constitution and Functions of State & Central Council, Registration & Procedure, Education Regulations.

#### Medicinal and Toilet Preparation Act -1955. Module 4

Objectives, Legal Definitions, Licensing, Bonded and Non-Bonded Laboratory, Ware Housing, Manufacture of Ayurvedic, Homeopathic, Patent & Proprietary Preparations.

#### Module 5 Narcotic Drugs and Psychotropic substances Act-1985 and (06Periods) Rules.

Objectives, Legal Definitions, General Study, Constitution and Functions of narcotic & Psychotropic Consultative Committee, National Fund for Controlling the Drug Abuse, Prohibition, Control and regulations, Schedules to the Act.

#### Drugs and magic remedies act (06Periods) Module 6 Study of Salient Features of Drugs and magic remedies Act and its rules. (06Periods) Module 7 Drugs price control order Study of essential Commodities Act Relevant to drugs price control Order Prevention Of Cruelty to animals Act-1960. (06Periods) Module 8 Prevention Of Cruelty to animals Act-1960. Module 9 Drug Price control Order & National Drug Policy (06Periods)

Drug Price control Order & National Drug Policy (Current). Patents & design Act-1970 Brief study of prescription and Non-prescription Products.

Total 60 periods

**COURSE DESCRIPTION:** This subject is designed to impart fundamental knowledge on the structure, chemistry, and therapeutic value of drugs. The subject emphasis on modern techniques of frational drug design like quantitative structure activity relationship (QSAR), Prodrug concept, combinatorial chemistry and Computer aided drug design (CADD). The subject also emphasizes or the chemistry, mechanism of action, metabolism, adverse effects, Structure Activity Relationships (SAR), therapeutic uses, and synthesis of important drugs.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to: **CO1.** Understand the importance of drug design and different techniques of drug design.

- **CO2.** Understand the chemistry of drugs concerning their biological activity.
- **CO3.** Know the metabolism, adverse effects, and therapeutic value of drugs and Know the importance of SAR of drugs.

#### **COURSE CONTENT**

#### Module 1: The modern concept of rational drug design (16 Periods)

A brief introduction to Quantitative Structure Activity Relationship (QSAR), prodrug, combinatorial chemistry and computer-aided drug design (CADD), and concept of antisense molecules. A study of the development of the following classes of drugs including SAR, mechanism of action, synthesis of important compounds, chemical nomenclature, brand names of important marketed products, and their side effects.

#### Module 2: Anti-infective agents 1. Anti-infective agents

- a) Local anti-infective agents
- b) Preservatives
- c) Antifungal agents
- d) Urinary tract anti-infectives
- e) Antitubercular agents
- f) Antiviral agents and Anti-AIDS agents
- g) Antiprotozoal agents
- h) Anthelmintics
- i) Antiscabies and Antipedicular agents

#### 2. Sulphonamides and sulphones

#### Module 3: Antimicrobial agents

- 4. Antimalarials
- 5. Antibiotics
- 6. Antineoplastic agents

#### Module 4: Drugs acting on CVS

- 7. Cardiovascular agents
  - a) Antihypertensive agents
  - b) Antianginal agents and vasodilators
  - c) Antiarrhythmic agents
  - d) Antihyperlipidemic agents
  - e) Coagulants and Anticoagulants
  - f) Endocrine
- 8. Hypoglycemic agents
- 9. Thyroid and Antithyroid agents

#### Module 5: Diuretics

10. Diuretics

#### 11. Diagnostic agents

12. Steroidal Hormones and Adrenocorticoids

COURSE DESCRIPTION: COURSE DESCRIPTION: This course is designed to impart a fundamental knowledge on the preparatory pharmacy with arts and science of preparing the different conventional dosage forms and novel drug delivery systems. Upon completion of this course the student should be able to Upon completion of the subject student shall be able to Know the principle involved in formulation of various pharmaceutical dosage forms, prepare various pharmaceutical formulation, perform evaluation of pharmaceutical dosage forms and understand appreciate the concept of bioavailability and bioequivalence, their role in clinical situations.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- CO1. Demonstrate the basics of pharmaceutical dosage forms, Tablets and capsules
- CO2. Design and analyze the liquid orals, parenteral dosage forms and ophthalmic preparations
- CO3. Design and analyze semisolid dosage forms and suppositories
- CO4. Design and analyze various controlled release dosage forms

# **COURSE CONTENT**

# Module 1 Solid dosage forms

Pharmaceutical dosage form: Concept and classification

a. Tablets: Formulation of different types of tablets, tablet excipients, granulation techniques quality control and evaluation of tablets. Tablet coating, Type of coating, quality control tests for coated tablet.

b. Capsules: Production and filling of hard gelatin capsules, Raw material for shell, finishing, quality control tests for capsules. Production and filling of soft gelatin capsules, quality control tests for soft gelatin capsules.

# Module 2 Liquid dosage forms

a. Liquid orals: Formulation and evaluation of suspensions, emulsions and solutions. Stability of these preparations

b. Parenterals: Introduction Containers used for Parenterals (including official tests) formulation of large and small volume Parenterals Sterilization

c. Ophthalmic preparations: Introduction and Classification, formulation, packging and storage

# Module 3 Semi – Solid dosage forms

a. Introduction and classification Factors affecting absorption and anatomy of skin Packaging storage and labeling, Ointments Types of Ointment Base Preparation of ointment, Jellies Types of jellies Formulation of jellies.

b. Suppositories, Method of preparation, Types and Packaging

# Module 4 Novel drug delivery systems

Definition and concept of Controlled and Novel Drug delivery systems with available examples, viz. parentral, transdermal, buccal, rectal, nasal, implants and ocular.

#### **EXPERIMENTS**

- 1. Study of laboratory animals and their handling (a. Frogs, b. Mice, c. Rats, d. Guinea pigs, e. Rabbits).
- 2. Study of physiological salt solutions used in experimental pharmacology.
- 3. Study of laboratory appliances used in experimental pharmacology.
- 4. Study of use of anesthetics in laboratory animals.
- 5. To record the dose response curve of Ach using isolated ileum/rectus abdominis muscle preparation
- 6. To carry out bioassay of Ach using isolated ileum/rectus abdominis muscle preparation by interpolation method.
- 7. To carry out bioassay of Ach using isolated ileum/rectus abdominis muscle preparation bythree point method.
- 8. To record the dose response curve of Histamine using isolated guinea-pig ileum preparation.
- 9. Study of agonistic and antagonistic effects of drugs using isolated guinea-pig ileum preparation
- 10. To carry out bioassay of Histamine using isolated guinea-pig ileum preparation by interpolation method.
- 11. To carry out bioassay of Histamine using guinea-pig ileum preparation by three point method
- 12. To study the routes of administration of drugs in animals (Rats, Mice, Rabbits).
- 13. Study of theory, principle, procedure involved and interpretation of given results for the following experiments:
  - a) Analgesic property of drug using analgesiometer.
  - b) Anti-inflammatory effect of drugs using rat-paw edema method.
  - c) Anticonvulsant activity of drugs using maximal electroshock and pentylenetetrazol methods.
  - d) Antidepressant activity of drugs using pole climbing apparatus and pentobarbitoneinduced sleeping time methods.
  - e) Locomotor activity evaluation of drugs using an actophotometer and rotorod.
  - f) Cardiotonic activity of drugs using isolated frog heart and mammalian heart preparations.

#### LIST OF EXPERIMENTS:

Hospital postings for a period of at least 50 Periods is required to understand the principles and practice involved in ward round participation and clinical discussion on selection of drug therapy. Students are required to maintain a record of 15 cases observed in the ward and the same should be submitted at the end of the course for evaluation. Each student should present at least two medical cases they have observed and followed in the wards Assessment of drug interactions in the given prescriptions

#### **Assignments:**

Students are required to submit written assignments on the topics given to them. Topics allotted should cover recent developments in drug therapy of various diseases.

A minimum of THREE assignments [1500–2000words] should be submitted for evaluation.

Format of the assignment:

Minimum & Maximum number of pages

Reference(s) shall be included at the end.

Assignment can be a combined presentation at the end of the academic year

It shall be computer draft copy

Name and signature of the student

Time allocated for presentation may be 8+2 Min.

**COURSE DESCRIPTION:** This course is designed to impart knowledge and skills necessary for imparting safe and effective use of medicines in patients. They also learn pharmacotherapy of diseases with etiopathogenesis, diagnostic criteria and drug therapy management practices. This also helps to understand and practice evidence-based medicine during disease management.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **C** Assess and manage gastrointestinal disorders, including peptic ulcer disease, GERD, inflammatory bowel disease, liver disorders, and drug-induced liver damage.
- **CO2.** Identify and treat hematological conditions such as anemias, venous thromboembolism, and drug-induced blood disorders effectively.
- **CO3.** Diagnose and develop treatment plans for neurological disorders, including epilepsy, Parkinsonism, stroke, and Alzheimer's disease.
- **CO4.** Implement pain management strategies, addressing pain pathways, neuralgias, and various types of headaches to improve patient outcomes.
- **CO5.** Diagnose and manage psychiatric disorders, including schizophrenia, affective disorders, anxiety, sleep disorders, obsessive-compulsive disorders, and alcohol withdrawal syndrome.
- **CO6.** Apply evidence-based medicine principles to evaluate and integrate the best available research evidence into clinical practice.

#### **COURSE CONTENT**

#### Module 1: GASTROINTESTINAL SYSTEM

Peptic ulcer disease, Gastro Esophageal Reflux Disease, Inflammatory bowel disease, Liver disorders - Alcoholic liver disease, Viral hepatitis including jaundice, Pancreatitis and Drug induced liver disorders.

#### Module 2: HEMATOLOGICAL SYSTEM

Anemias, Venous thromboembolism, Drug induced blood disorders.

#### Module 3: NERVOUS SYSTEM

Epilepsy, Parkinsonism, Stroke, Alzheimer's disease,

#### Module 4: PAIN MANAGEMENT

Pain management including Pain pathways, neuralgias, headaches.

#### Module 5: PSYCHIATRY DISORDERS

Schizophrenia, Affective disorders, anxiety disorders, sleep disorders, obsessive compulsive disorders, Alcohol withdrawal syndrome

#### Module 6: EVIDENCE BASED MEDICINE

Evidence Based Medicine

#### Total Periods: 75

23PP201006 Pre-Requisite -Anti-Requisite -Co-Requisite -

**COURSE DESCRIPTION:** This course provides a detailed discussion and hands-on experience on art, practice, and profession of choosing, preparing, storing, compounding, and dispensing medicines and medical devices, advising healthcare professionals and patients on their safe, effective and efficient use.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Manage hospital pharmacy operations, including organizational structure, staff, infrastructure, material management, and financial oversight, ensuring efficient pharmacy services.
- **CO2.** Develop and implement hospital drug policies, including formulary management, committee involvement, therapeutic guidelines, and pharmacy communication strategies.
- **CO3.** Oversee drug distribution methods, including individual prescriptions, floor stock, and module dose distribution, as well as manage central sterile supply services.
- **CO4.** Handle hospital pharmacy services, including budget preparation, drug procurement, warehousing, and inventory control using methods like ABC, VED, and EOQ.
- **CO5.** Manufacture various pharmaceutical products in a hospital setting, including sterile formulations, ointments, tablets, capsules, and total parenteral nutrition, ensuring quality and safety.
- **CO6.** Engage in professional development and training, maintaining and enhancing skills, and fostering professional relationships within hospital pharmacy practice.

#### **CO-PO-PSO Mapping Table:**

Correlation Levels: 3: High; 2: Medium;

#### **COURSE CONTENT**

#### Module 1: HOSPITAL PHARMACY

Hospital - its organization and functions

- Hospital Pharmacy-Organization and management
  - a) Organizational Structure-Staff, Infrastructure & work load statistics
  - b) Management of materials and finance
  - c) Roles & responsibilities of hospital pharmacist.

#### Module 2: HOSPITAL DRUG POLICY

- a) Pharmacy and Therapeutic committee (PTC)
- b) Hospital formulary
- c) Hospital committees Infection committee Research and ethical committee
- d) Developing therapeutic guidelines
- e) Hospital pharmacy communication Newsletter

#### Module 3: DRUG DISTRIBUTION AND CENTRAL STERILE (10 Periods) SUPPLY SERVICES

- a) Drug distribution in the hospital
  - i. Individual prescription method,
  - ii. Floor stock method,
  - iii. Module dose drug distribution method
- b) Distribution of Narcotic and other controlled substances
- c) Central sterile supply services Role of pharmacist

#### Module 4: HOSPITAL PHARMACY SERVICES

- a) The Budget Preparation and implementation
- b) Procurement & warehousing of drugs and pharmaceuticals
- c) Inventory control Definition, various methods of Inventory Control ABC, VED, EOQ, Lead time, safety stock

#### Module 5: MANUFACTURING IN HOSPITAL PHARMACY (14 Periods)

- a) Sterile formulations large and small volume Parenterals.
- b) Manufacture of Ointments, Liquids, and creams.
- c) Manufacturing of Tablets, granules, capsules, and powders.
- d) Total parenteral nutrition.
- e) Radio Pharmaceuticals Handling and packaging.

#### Module 6: PROFESSIONAL DEVELOPMENT& RELATIONS

Continuing professional development programs Education and training. Professional Relations and practices of hospital pharmacist.

# Course Title CLINICAL PHARMACY

L T P 3 1 -

Pre-Requisite -Anti-Requisite -Co-Requisite -

**COURSE DESCRIPTION:** This course provides a detailed discussion and hands-on experience on History and evolution of clinical pharmacy, clinical pharmacy activities, interpretation of laboratory tests, drug information, pharmaceutical care and medication errors.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Define and apply clinical pharmacy concepts, including drug therapy monitoring, ward round participation, adverse drug reaction management, and quality assurance of pharmacy services.
- **CO2.** Analyze patient data effectively, including case history structure and medical abbreviations, to evaluate and optimize drug therapy in clinical settings.
- **CO3.** Deliver clinical pharmacy services by implementing pharmaceutical care concepts, managing medication errors, enhancing patient communication, and critically evaluating biomedical literature.
- **CO4.** Interpret laboratory data for disease evaluation, including tests related to hematology, liver, renal, thyroid functions, cardiac disorders, fluid balance, and microbiological cultures.
- **CO5.** Utilize drug and poison information resources, systematically address drug information queries, evaluate literature, and establish and manage a Drug Information Centre.
- **CO6.** Understand and apply pharmacovigilance principles, including ADR classification, causality assessment, reporting, monitoring, and management, and the pharmacist's role in ADR management.

#### **CO-PO-PSO Mapping Table:**

### **COURSE CONTENT**

#### Module 1: EVOLUTION OF CLINICAL PHARMACY

1. Definitions, development and scope of clinical pharmacy.

- 2. Introduction to daily activities of a clinical pharmacist
- a) Drug therapy monitoring (medication chart review, clinical review, pharmacist interventions)
- b) Ward round participation
- c) Adverse drug reaction management
- d) Drug information and poisons information
- e) Medication history
- f) Patient counseling
- g) Drug utilization evaluation (DUE) and review (DUR)
- h) Quality assurance of clinical pharmacy services.

### Module 2: PATIENT DATA ANALYSIS

- a) The patient's case history, its structure and use in evaluation of drug therapy.
- b) Understanding common medical abbreviations and terminologies used in clinical practices.

### Module 3: CLINICAL PHARMACY SERVICES

- a) Pharmaceutical care concepts
- b) Medication errors
- c) Patient communication Communication skills, including patient counselling techniques, medication history interview, presentation of cases
- d) Critical evaluation of biomedical literature

### Module 4: INTERPRETATION OF LABORATORY DATA

Clinical laboratory tests used in the evaluation of disease states, and interpretation of test results

- a) Haematological, Liver function, Renal function and thyroid function tests.
- b) Tests associated with cardiac disorders.
- c) Fluid and electrolyte balance.
- d) Microbiological culture sensitivity tests.
- e) Pulmonary Function Tests.

### Module 5: DRUG & POISON INFORMATION

- a) Introduction to drug information resources available.
- b) Systematic approach in answering DI queries.
- c) Critical evaluation of drug information and literature.
- d) Preparation of written and verbal reports.
- e) Establishing a Drug Information Centre.
- f) Poisons information- organization & information resources.

### Module 6: PHARMACOVIGILANCE

- a) Scope, definition and aims of pharmacovigilance.
- b) Adverse drug reactions Classification, mechanism and predisposing factors.

23PY201005	<b>BIOSTATISTICS AND RESEARCH METHODOLOGY</b>	2	1	-
<b>Pre-Requisite</b>	-			
Anti-Requisite	-			
<b>Co-Requisite</b>	-			

**COURSE DESCRIPTION:** This course provides a detailed discussion on basic concepts of research and its methodologies, define appropriate research problem and parameters, organize and conduct research in a more appropriate manner.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Design and evaluate clinical studies using various methodologies, including case studies, observational studies, interventional studies, and determine sample size and report findings effectively.
- **CO2.** Apply biostatistical methods to describe data distributions, central tendencies, and data spread using average, median, mode, standard deviation, and variance.
- **CO3.** Create and interpret data graphics, including histograms, pie charts, scatter plots, and semilogarithmic plots, for effective visual representation of data.
- **CO4.** Perform hypothesis testing using parametric and non-parametric methods, including t-tests, chi-square tests, ANOVA, and regression analysis, and utilize statistical software.
- **CO 5** Utilize statistical methods in epidemiology to measure incidence, prevalence, relative risk, and attributable risk, aiding in the assessment of health outcomes.
- **CO 6** Apply computer applications in pharmacy for hospital and community settings, including patient record management, medication order entry, inventory control, and drug information retrieval.

#### **CO-PO-PSO Mapping Table:**

Correlation Levels: 3: High; 2: Medium; 1: Low

#### **COURSE CONTENT:**

#### Module 1: RESEARCH METHODOLOGY

- a) Types of clinical study designs: Case studies, observational studies, interventional studies,
- b) Designing the methodology
- c) Sample size determination and Power of a study, Determination of sample size for simple comparative experiments, determination of sample size to obtain a confidence interval of specified width, power of a study
- d) Report writing and presentation of data

#### Module 2: BIOSTATISTICS

- a) Introduction
- b) Types of data distribution
- c) Measures describing the central tendency distributions- average, median, mode
- d) Measurement of the spread of data-range, variation of mean, standard deviation, variance, coefficient of variation, standard error of mean.

#### Module 3: DATA GRAPHICS

- a) Construction and labelling of graphs.
- b) Histogram, pie charts, scatter plots, semilogarithmic plots.

#### Module 4: BASICS OF TESTING HYPOTHESIS

- a) Null hypothesis, level of significance, power of test, P value, statistical estimation of confidence intervals.
- b) Level of significance (Parametric data)- students t test (paired and unpaired), chi Square test, Analysis of Variance (one-way and two-way).
- c) Level of significance (Non-parametric data)- Sign test, Wilcoxan's signed rank test, Wilcoxan rank sum test, Mann Whitney U test, Kruskal-Wall is test (one way ANOVA).
- d) Linear regression and correlation- Introduction, Pearsonn's and Spearmann's correlation and correlation co-efficient.
- e) Introduction to statistical software: SPSS, Epi Info, SAS.

#### Module 5: STATISTICAL METHODS IN EPIDEMIOLOGY

- a) Incidence and prevalence.
- b) Relative risk.
- c) Attributable risk.

#### Module 6: COMPUTER APPLICATIONS IN PHARMACY

- a) Computer System in Hospital Pharmacy: Patterns of Computer use in Hospital Pharmacy Patient record database management, Medication order entry – Drug labels and list – Intravenous solution and admixture, patient medication profiles, Inventory control, Management report & Statistics.
- b) Computer In Community model Pharmacy Computerizing the Prescription Dispensing process, Use of Computers for Pharmaceutical Care in community model pharmacy, Accounting and General ledger system.
- c) Drug Information Retrieval & Storage: Introduction Advantages of Computerized Literature Retrieval, Use of Computerized Retrieval

**COURSE DESCRIPTION:** This course provides various skills to carry out, design and apply the concepts like compartmental modeling, noncompartmental modeling, and other methods to study the processes of drug absorption, drug distribution, drug metabolism, drug elimination.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Analyze drug absorption, distribution, and elimination processes to understand their effects on drug efficacy and safety in biopharmaceutics.
- **CO2.** Apply pharmacokinetic principles, including mathematical models and compartmental analysis, to study drug levels and optimize dosing regimens.
- **CO3.** Utilize one-compartment and multi-compartment models to understand and predict drug behavior following intravenous and oral administration.
- **CO4.** Evaluate and apply multiple-dose regimens using one-compartment and twocompartment models for effective drug therapy and management.
- **CO5.** Implement noncompartmental and nonlinear pharmacokinetic methods to assess drug behavior and parameters, including statistical moment theory and Michaelis-Menten kinetics.
- **CO6.** Conduct bioavailability and bioequivalence studies, including protocol design and assessment methods, to ensure drug products meet required standards.

**CLINICALTOXICOLOGY** 

--

COURSE DESCRIPTION: This course provides knowledge in the area of clinical management of different poison cases and facilitates students to learn in direct toxicological care area including Identification of toxins, pathological changes upon exposure, management practices of poison cases and preventive approaches for the public.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

CO1.	Apply general principles of poison management, including antidote use, supportive care, gut decontamination, and toxicokinetics for effective treatment.
CO2.	Identify venomous snake species, understand their clinical effects, and manage snake bites, including first aid and treatment of complications.
CO3.	Recognize and manage acute poisoning cases, including pesticides, opiates, alcohol, and caustics, with appropriate clinical interventions.
CO4.	Diagnose and treat chronic poisoning from heavy metals such as arsenic, lead, mercury, iron, and copper.
CO5.	Address poisoning from plants, mushrooms, and food, and manage envenomations from arthropod bites and stings.
CO6.	Identify and treat substance abuse, including signs, symptoms, and management of dependence on CNS stimulants, depressants, hallucinogens, and tobacco.

#### Module 2: **VENOMOUS SNAKE BITES**

- a) Families of venomous snakes.
- b) Clinical effects of venoms.
- c) General management as first aid, early manifestations, complications and snake bite injuries.

#### Module 3: ACUTE POISONING

Clinical symptoms and management of acute poisoning with the following agents-

- Pesticide poisoning: organophosphorus compounds, carbamates, organochlorines, a) pyrethroids.
- b) Opiates overdose, Antidepressants, Barbiturates and benzodiazepines.
- c) Alcohol: ethanol and methanol.
- d) Paracetamol and salicylates, Non-steroidal anti-inflammatory drugs.
- e) Hydrocarbons: Petroleum products and PEG.
- f) Caustics: inorganic acids and alkali, Radiation poisoning.

#### **CHRONIC POISONING** Module 4:

Clinical symptoms and management of chronic poisoning with the Heavy metals-

- a) Arsenic
- b) Lead
- c) Mercury
- d) Iron
- e) Copper.

#### Module 5: **PLANT, FOOD & ENVENOMATIONS**

- a) Plants poisoning.
- b) Mushrooms and Mycotoxins.
- c) Food poisonings.
- d) Envenomations Arthropod bites and stings.

#### Module 6: SUBSTANCE ABUSE

- a) Signs and symptoms of substance abuse and treatment of dependence.
- b) CNS stimulants: amphetamine, Opioids, CNS depressants, Hallucinogens: LSD, Cannabis group, Tobacco.

MBU23 Academic Regulations and Curriculum - Pharm.D 137

### **COURSE CONTENT**

#### Module 1: **PRINCIPLES OF POISON MANAGEMENT**

- a) General principles involved in the management of poisoning.
- b) Antidotes and the clinical applications.
- c) Supportive care in clinical Toxicology.
- d) Gut Decontamination and Elimination Enhancement.
- e) Toxicokinetics.

**COURSE DESCRIPTION:** This course is designed to impart knowledge and skills in developing therapeutic plan and provide pharmaceutical care to the patients using SOAP notes.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

**CO5.** Demonstrate the treatment goals to the patient;

- **CO6.** Analyze patient outcome in selection, monitoring and initiation of drug therapies;
- **C07.** Provide feedback to clinicians regarding drug related needs.
- **CO8.** Work independently and in teams to solve problems with effective communications

#### LIST OF EXPERIMENTS:

Hospital postings for a period of at least 50 Periods is required to understand the principles and practice involved in ward round participation and clinical discussion on selection of drug therapy. Students are required to maintain a record of 15 cases observed in the ward and the same should be submitted at the end of the course for evaluation. Each student should present at least two medical cases they have observed and followed in the wards Assessment of drug interactions in the given prescriptions

#### **ASSIGNMENTS:**

Students are required to submit written assignments on the topics given to them. Topics allotted should cover recent developments in drug therapy of various diseases.

A minimum of THREE assignments [1500–2000words] should be submitted for evaluation. Format of the assignment:

- i. Minimum & Maximum number of pages
- ii. Reference(s) shall be included at the end.
- iii. Assignment can be a combined presentation at the end of the academic year
- iv. It shall be computer draft copy
- v. Name and signature of the student
- vi. Time allocated for presentation may be 8+2 Min.

LIST OF EXPERIMENTS: (Minimum 15 experiments shall be conducted)

- 1 Answering drug information questions (4 Nos).
- 2. Patient medication counselling (4 Nos).
- 3. Case studies related to laboratory investigations (4 Nos).
- 4. Patient medication history interview (3 Nos)

#### LIST OF ASSIGNMENT:

Students are expected to submit THREE written assignments (1500 – 2000 words) on the topics given to them covering the following areas dealt in theory class.

Drug information, Patient medication history interview, Patient medication counselling, Critical appraisal of recently published articles in the biomedical literature which deals with a drug or therapeutic issue.

Format of the assignment:

- i. Minimum & Maximum number of pages.
- ii. Reference(s) shall be included at the end.
- iii. Assignment can be a combined presentation at the end of the academic year.
- iv. It shall be computer draft copy.
- v. Time allocated for presentation may be 8+2 Min.

LTP

- - 3

Pre-Requisite Anti-Requisite Co-Requisite

**COURSE DESCRIPTION:** This course provides various skills to carry out, design and apply the concepts like compartmental modeling, noncompartmental modeling, and other methods to study the processes of drug absorption, drug distribution, drug metabolism, drug elimination.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- **CO1.** Acquire skills to carryout Invitro dissolution studies.
- **CO2.** Design& apply skills to know the protein binding of drugs bioavailability of drugs.
- **CO3.** Apply appropriate formula to determine& interpret various pharmacokinetic parameters.
- **CO4.** Apply in-vitro and ex-vivo methods to estimate the absorption of drugs.
- **CO5.** Work independently & communicate effectively in oral and written forms.

#### **CO-PO-PSO Mapping Table:**

**Correlation Levels:** 

3: High;

2: Medium;

1: Low

# **EXPERIMENTAL LEARNING**

- 1. Improvement of dissolution characteristics of slightly soluble drugs by some methods
- 2. Comparison of dissolution studies of two different marketed products of same drug
- 3. Influence of polymorphism on solubility and dissolution
- 4. Protein binding studies of a highly protein bound drug and poorly protein bound drug
- 5. Extent of plasma-protein binding studies on the same drug (i.e. highly and poorly protein bound drug) at different concentrations in respect of constant time
- 6. Bioavailability studies of some commonly used drugs on animal/human model.
- 7. Calculation of Ka, Ke, t1/2, Cmax, AUC, AUMC, MRT etc. from blood profile data
- 8. Calculation of bioavailability from urinary excretion data for two drugs

- 9. Calculation of AUC and bioequivalence from the given data for two drugs
- 10. In vitro absorption studies.
- 11. Bio equivalency studies on the different drugs marketed. (eg) Tetracycline, Sulphamethoxzole, Trimethoprim, Aspirin etc., on animals and human volunteers.
- 12. Absorption studies in animal inverted intestine using various drugs
- 13. Effect on contact time on the plasma protein binding of drugs.
- 14. Studying metabolic pathways for different drugs based on elimination kinetics data.
- 15. Calculation of elimination half-life for different drugs by using urinary elimination data and blood level data.
- 16. Determination of renal clearance

#### **TEXT BOOKS:**

- 1. Pharmacokinetics: By Milo Glbaldi Donald, R. Mercel Dekker Inc.
- 2. Bio pharmaceutics and Pharmacokinetics-A Treatise, By D. M. Brahmankar and Sunil B. Jaiswal, Vallabh Prakashan Pitampura, Delhi
- 3. Biopharmaceutics and Clinical Pharmacokinetics-An introduction 4th edition Revised and expanded by Robert F Notari Marcel Dekker Inn, New York and Basel, 1987.
